Argumentation Analysis Evaluation Presentation:

Argumentation Frans H. van Eemeren, A. Francisca Sn Henkemans, Rob Grootendorst, 2002-01-01 This book concentrates on argumentation as it emerges in ordinary discourse whether the discourse is institutionalized or strictly informal. Crucial concepts from the theory of argumentation are systematically discussed and explained with the help of examples from real life discourse and texts. The basic principles are explained that are instrumental in the analysis and evaluation of argumentative discourse. Methodical instruments are offered for identifying differences of opinion, analyzing and evaluating argumentation and presenting arguments in oral and written discourse. In addition, the book provides a great variety of exercises and assignments to improve the students' skill in presenting argumentation. The authors begin their treatment of argumentation theory at the same juncture where argumentation also starts in practice: The difference of opinion that occasions the evolution of the argumentation. Each chapter begins with a short summary of the essentials and ends with a number of exercises that students can use to master the material. *Argumentation* is the first introductory textbook of this kind. It is intended as a general introduction for students who are interested in a proper conduct of argumentative discourse. Suggestions for further reading are made for each topic and several extra assignments are added to the exercises. Special features: A concise and complete treatment of both the theoretical backgrounds and the practice of argumentation analysis and evaluation. Crucial concepts from pragmatics, speech act theory, Grice's cooperative principle presented in a non-technical way, introducing the theory of verbal communication. Unique coverage of both oral and written presentation of arguments. Exercises and assignments based on real life texts from a variety of contexts.

to theoretical and methodological reflections by leading scholars in their fields the book contains studies of the relationship between language and argumentation from two different viewpoints While some chapters take a specific argumentative move as their point of departure and investigate the ways in which it is linguistically manifested in discourse other chapters start off from a linguistic construction trying to determine its argumentative function and rhetorical potential The Language of Argumentation documents the currently prominent research on stylistic aspects of argumentation and illustrates how the study of argumentation benefits from insights from linguistic models ranging from theoretical pragmatics politeness theory and metaphor studies to models of discourse coherence and construction grammar
