Vaadia, 1960 **Selected Water Resources Abstracts**, 1978-05 **Water Resources and Agricultural Development in the Tropics** Christopher J. Barrow, 2016-07-01 First published in 1988 There are many excellent texts on water supply and irrigation engineering irrigation economics agricultural development and the problems which often plague such efforts Few syntheses of such writings have been made despite a clear need for them from people interested in water resources and agricultural development students of geography economics development studies and agricultural management administrators planners and aid agency staff This book attempts to provide a broad interdisciplinary introduction for such people **Plants in Saline Environments** A. Poljakoff-Mayber, J. Gale, 2012-12-06 A POLJAKOFF MAYBER and J GALE The response of plants to saline environments is of interest to people of many disciplines In agriculture the problem of salinity becomes more severe every year as the non saline soils and the non saline waters become more intensively and more extensively exploited Further expansion of agriculture must consider the cultivation of saline soils and the use of water with a relatively high content of soluble salts Moreover industrial development in many countries is causing severe water pollution especially of rivers and mismanagement in agriculture often induces secondary salinization of soils and sources of irrigation water From the point of view of agriculture it is therefore of the utmost importance to know the various responses of plants to salinity and to understand the nature of the damage caused by salinity to agricultural crops Botanists and plant physiologists study plants their form growth metabolism and response to external stimuli A challenging problem for them is to understand the differences between glycophytes plants growing in a non saline environment and halophytes plants which normally grow in salt marshes in sea water or in saline soils This includes the elucidation of structural and functional adaptations which enable halophytes to tolerate the saline environment and also questions as to whether they only tolerate the saline environment or actually thrive in it Ecologists and environmentalists are interested in the interrelationships between the organism in this case the plant and its environment from the climatic edaphic and biotic points of view *Acta Agronomica Academiae Scientiarum Hungaricae*, 1983 **Israel Journal of Botany**, 1975 Books in Series, 1985 Vols for 1980 issued in three parts Series Authors and Titles Subject Guide to Books in Print, 1983 **The Journal of Horticultural Science**, 1996
