Cruise Missiles Technology Strategy Politics

Jacquelyn Schneider, MacDonald

Cruise Missiles Technology Strategy Politics:

Cruise Missiles Richard K. Betts, 1981-11 The cruise missile is the principal innovation in U S weaponry in the early 1980s Because it is inexpensive and versatile it is likely to be used for a wide range of military missions At the same time it has become a delicate issue in arms control and alliance politics Although cruise missile programs are among the most dynamic elements in the U S defense buildup their consequences have not been fully appreciated This book assesses the complex set of technological budgetary strategic diplomatic and political implications of this new weapon as a contribution to public understanding of its pervasive influence on diplomacy and military affairs Cruise missile technology and development programs are dealt with in chapters by John C Toomay Godron MacDonald Jack Ruina and Mark Balaschak Ron Huisken and John C Baker Military uses and arm control implications are discussed by Bruce Bennett and James Foster Roger H Palin Richard Burt Michael MccGwire George H Quester and William H Kinkade Diplomatic and national political questions are analyzed by Raymond L Garthoff Robert J Art and Stephen E Ockenden Gregory F Treverton Lawrence D Freedman and Catherine McArdle Kelleher **Cruise Missiles** ,1981 **Cruise missiles, technology, strategy, politics** ,1978

Military Technology, Military Strategy and the Arms Race Marek Thee, 2025-03-03 First published in 1986 Military Technology Military Strategy and the Arms Race argues that a principal factor contributing to the arms race is the military research and development R and D sector It traces the arms race since World War II and explores the relationship between the emergence of new weapon technology the development of new weapon systems and their impact on strategic thinking It considers the positions for both the United States and its allies in NATO and for the erstwhile Soviet Union It argues that military R and D which consumes an increasing proportion of total funds spent on R and D has developed a self sustaining technological momentum which is baked by a powerful military industrial bureaucratic technological complex and is increasingly out of control of political leaders The book argues that negotiations to limit the numbers of weapons fail to address the main problem and that more emphasis should be given to considering ways of limiting and controlling military R and D It concludes by proposing a radical shift in policy to achieve this This historical reference work is important for scholars and researchers of military studies defence studies international relations diplomacy and international politics

Professional Journal of the United States Army ,1982 *Naval Law Review* ,1988 Military Review ,1982

Quarterly Review of Military Literature ,1982 The Rise of Unmanned Warfare Jacquelyn

Schneider, MacDonald, 2023-12-15 What explains the current US arsenal of unmanned systems Why for example is the contemporary arsenal dominated by aerial unmanned systems versus the munitions that dominated earlier developments This book challenges traditional explanations for the proliferation of unmanned systems which focus on capacity or structure Instead this book argues that beliefs and identities shape the structures and capacities we choose when we are investing in weapon systems In particular it traces beliefs about technological determinism and military revolutions force protection and

casualty aversion and service identities to explain why the US has invested so heavily in remote controlled unmanned aerial platforms over the last three decades In doing so the book illustrates how ideas become influence and ultimately manifest in budget lines detailing the policy entrepreneurs critical junctures and path dependencies that shape the lifecycle of beliefs about unmanned weapon systems The book begins by providing a historical overview of US unmanned systems investments taking an expansive view of unmanned technologies from land mines to missiles and drones from the revolutionary war to contemporary investments It then leans on theories of norms ideas and influence to detail the role of the Office of Net Assessment Vietnam 9 11 and armed service identity in building the US current unmanned arsenal Finally it concludes with what this case of unmanned technologies reveals about US support to Ukraine as well as contemporary weapons debates about cyber information technology space and hypersonic missiles **Cruise Missile** S. K. Sharma (Army officer),2016

THE POLITICS OF SOVIET STRATEGIC DEFENSE: POLITICAL STRATEGIES, ORGANIZATIONAL POLITICS, AND SOVIET STRATEGIC THOUGHT. (VOLUMES I AND II). STUART JAY KAUFMAN,1991 services but arms control especially the ABM Treaty offered a policy handle which helped them to affect doctrine and force posture to a substantial degree The Germans and the INF Missiles Susanne Peters,1990 *Technology and Culture* ,1992 **New York University Journal of International Law & Politics** New York University. International Law Society,1982 **Naval law review** ,1988 **United States Political Science Documents** ,1990 Political Science Abstracts IFI-Plenum Data Company Staff,1983-11-01 **International Journal** ,1989 *Journal of Transnational Law & Policy* ,2004 *Political Science Quarterly* ,1983 Offers timely analysis of both domestic and foreign policy issues as well as of political institutions and processes
