Depending on the news you read new tools like AI will either save or destroy us But our response to emerging technology s unprecedented threats actually follows a pattern as old as civilisation From ancient Athens to COVID 19 social media to spam Alicia Wanless shows how humans have always consumed information whether accurate or not First a new technology changes how information is shared broadening its availability and accelerating how fast it travels Then as more people engage with this new content fresh ideas arise often challenging prevailing beliefs Some use the new tools to promote their views win power or simply profit adding to the mounting information pollution Competition and conflict follow We scramble in vain to control information flows and use of the new technology With democracies worldwide lurching from crisis to crisis knee jerk reactions to information conflict won t suffice What s needed is an understanding of our nature as information animals in a millennia long relationship with technology and of how a content saturated world impacts the political battle for hearts and minds
