## **Crystallization As A Separations Process:**

Crystallization as a Separations Process Allan S. Myerson, 1990 Developed from a symposium sponsored by the International Chemical Congress of the Pacific Basin Societies Honolulu Hawaii December 1989 this book presents the current research which will aid in the development implementation and improvement of crystallization as a separation and purification process Sections cover basic studies including crystal growth nucleation impurity crystal interactions and solution structure crystallizer operation and control crystallization of organic and biomolecules and crystallization and precipitation of inorganic materials Annotation copyrighted by Book News Inc Portland OR

**Handbook of Separation Process Technology** Ronald W. Rousseau, 1987-05-13 Surveys the selection design and operation of most of the industrially important separation processes Discusses the underlying principles on which the processes are based and provides illustrative examples of the use of the processes in a modern context Features thorough treatment of newer separation processes based on membranes adsorption chromatography ion exchange and chemical complexation Includes a review of historically important separation processes such as distillation absorption extraction leaching and crystallization and considers these techniques in light of recent developments affecting them

**Crystallization Process Systems** Alan G. Jones, 2002-04-04 Crystallization Process Systems gives a clear concise balanced and up to date presentation of crystallization and solid liquid separation of the crystalline product The information is presented in a coherent concise and logical sequence based on the fundamentals of particulate crystallization processes as systems By emphasising the analysis design and operation of particulate crystallization processes as systems the reader will be able to make a better judgement about the best cheapest and most effective production method to use Presents a coherent concise and logical sequence based on the fundamentals of particulate crystallization processes as systems Emphasis on the design and optimization of the crystallization processing system

Radium-barium Separation Process M. L. Salutsky,J. G. Stites,1951 The separation of radium from barium radium mixtures by fractional precipitation from homogeneous solution of the chromates and carbonates was investigated A discussion of distribution coefficients indicates that fractionation systems in which logarithmic distribution is obtained are more efficient than those in which the radium is distributed homogeneously in the crystals For the chromates and carbonates a logarithmic distribution of radium in the crystals was proved by calculating distribution coefficients The effects on the

distribution coefficients of temperature of barium concentration and of radium concentration with respect to barium were determined Radium enrichment studies indicate that a procedure utilizing the fractional precipitation of barium radium chromate mixtures could compete on a commercial basis with the usual fractional crystallization of halides and would be more efficient than the fractional precipitation of the carbonates
