Rodgers, Rodgers D. Rodgers, 2002 Century's Child is the saga of the Richards family whose protagonist describes the interaction of his family typical of tens of thousands like it with the military and political history of this country from 1900 to 1998 with a single flashback to November 1864 Sherman's March to the Sea and a flash over to the Somme July 1 1916 The setting is principally a Midwestern city but over half the action takes place at multiple scattered Army posts in South Vietnam and in Arabia The first person protagonist is determined to break out of the blue collar world to break the mold of generations of skilled labor and feels driven to see just how far he can rise He wants to do something to make the world better and perhaps to make a difference in its history And it is not in him to say die Medical school is the logical first choice in 1954 he begins pre med the first of the Richards clan to do so His weaknesses are almost overwhelming in the 1950s no

money no student loans then no family endorsement maybe we should keep to our place a disastrous failed engagement to the love of his life minimal skills to cope with adversity and probably most importantly he is not as intelligent as he believes that he is The antagonist is the established order which is fuelled by the sweat of the blue collar class The fewer of the establishment that there are the more fuel is available to each of them The Establishment is easy to identify you can tell by the way that its members treat anyone who cannot retaliate And its great strength lies principally in its incumbency The conflict is not in whether the protagonist will succeed in breaking away into upward mobility that becomes obvious early in the narrative but in demonstrating how first with the help of intensive military training and then with a year in Vietnam which makes up half the book he does it
