Sandra Lapointe,Erich H. Reck,2023-06-16 This book presents a series of case studies and reflections on the
historiographical assumptions methods and approaches that shape the way in which philosophers construct their own past
The chapters in the volume advance discussion of the methods of historians of philosophy while at the same time illustrating
the various ways in which philosophical canons come into existence debunking the myth of analytical philosophy s
ahistoricism and providing a deeper understanding of the roles historiographical devices play in philosophical thought More
importantly the contributors attempt to understand history of philosophy in connection with other historical and
historiographical approaches contributors engage classical history of science sociology of knowledge history of psychology
and historiography in dialogue with historiographical practices in philosophy more narrowly construed Additionally select
chapters adopt a more diverse perspective by making place for non Western approaches and for efforts to construe new
philosophical narratives that do justice to the voice of women across the centuries Historiography and the Formation of
Philosophical Canons will be of interest to researchers and advanced students working in history of philosophy meta
