Cy Twombly's Things Kate Nesin, 2014 Cy Twombly 1928-2011 is widely acknowledged as one of the postwar period's most influential American artists yet his sculptures are little known. From 1946 onward he made hundreds of rarely exhibited found object assemblages often painted or plastered over with diverse coatings of white. Across decades Twombly thus developed a singular strikingly consistent body of work despite the shifting status of sculpture during his lifetime. In this revelatory monograph Kate Nesin first establishes then evaluates the artist's long engagement with the historical and contemporary limits of sculpture both as medium and as word. While others have described Twombly's three-dimensional works as timeless transcendent and poetic Nesin complicates our sense of their so-called poetry focusing on the prosaic conspicuously material operations of these sculptural things and emphasizing the inherent difficulties as well as possibilities of the language used to characterize them. Through close readings of individual works and in-depth analyses of certain guiding concerns such as surface naming gaps and repetitions she illuminates Twombly's remarkable sculptural practice.

The Truth Is Always Grey Frances Guerin, 2018-01-30 Changing how we look at and think about the color grey. Why did many of the twentieth century's best-known abstract painters often choose grey frequently considered a noncolor and devoid of meaning? Frances Guerin argues that painters including Jasper Johns Cy Twombly Agnes Martin Brice Marden Mark Rothko and Gerhard Richter select grey to respond to a key question of modernist art: What is painting? By analyzing an array of modernist paintings Guerin demonstrates that grey has a unique history and a legitimate identity as a color. She traces its use by painters as far back as medieval and Renaissance art through Romanticism to nineteenth and twentieth-century modernism to show how grey is the perfect color to address the questions asked by painting within art history and to articulate the relationship between painting and the historical world of industrial modernity. A work of exceptional erudition breadth and clarity presenting an impressive range of canonical paintings across centuries as examples. *The Truth Is Always Grey* is a treatise on color that allows us to see something entirely new in familiar paintings and encourages our appreciation for the innovation and dynamism of the color grey.

Merleau-Ponty at the Gallery Véronique M. Fóti, 2020-03-01 A study of the significance of the visual arts in Merleau-Ponty's aesthetics in relation to the work of five artists not known or discussed by him. Merleau-Ponty's phenomenological ontology engages deeply with visual art and this aspect of his work remains significant not only to philosophers but also to artists art theorists and critics. Until recently scholarly attention has been focused on the artists he himself was inspired by and wrote about chiefly Cézanne Klee Matisse and Rodin. Merleau-Ponty at the Gallery expands and shifts the focus to address a range of artists: Giorgio Morandi Kiki Smith Cy Twombly Joan Mitchell and Ellsworth Kelly whose work came to prominence in the second half of the twentieth century and thus primarily after the philosopher's death. Véronique M. Fóti does not confine her analyses to Merleau-Ponty's texts which now importantly include

his late lecture courses but also engages directly with the art Of particular concern to her is the art s ethical bearing especially as related to animal and vegetal life The book s concluding chapter addresses the still widespread rejection of beauty as an aesthetic value The book operates along several lines at once offering insightful and new critical readings of artists through the lens of Merleau Ponty s scholarship Clearly written and engaging it will be of interest to a wide range of scholars and students Rajiv Kaushik Brock University
