Cybercrime: Conceptual Issues for Congress and U. S. Law Enforcement Kristin M. Finklea,Catherine A. Theohary,2012-06-12 Twenty first century criminals increasingly rely on the Internet and advanced technologies to further their criminal operations These criminals can easily leverage the Internet to carry out traditional crimes such as distributing illicit drugs and sex trafficking In addition they exploit the digital world to facilitate crimes that are often technology driven including identity theft payment card fraud and intellectual property theft Cybercrimes have economic public health and national security implications among others For over three decades Congress has been concerned about cybercrime and its related threats Today these concerns often arise among a larger discussion surrounding the federal government's role in ensuring U S cyber security Conceptualizing cybercrime involves a number of key elements and questions that include where do the criminal acts exist in the real and digital worlds and what technologies are involved in carrying out the crimes why are malicious activities initiated and who is involved in carrying out the malicious acts The U S government does not appear to have an official definition of cybercrime that distinguishes it from crimes committed in what is considered the real world Similarly there is not a definition of cybercrime that distinguishes it from other forms of cyber threats and the term is often used interchangeably with other Internet or technology linked malicious acts Federal law enforcement agencies often define cybercrime based on their jurisdiction and the crimes they are charged with investigating And just as there is no overarching definition for cybercrime there is no single agency that has been designated as the lead investigative agency for combating cybercrime The United States does not have a national strategy exclusively focused on combating cybercrime Rather there are other broader strategies that have cybercrime components

Policymakers may question whether there should be a distinct strategy for combating cybercrime or whether efforts to control these crimes are best addressed through more wide ranging strategies such as those targeting cyber security or transnational organized crime Congress may also question whether these broader strategies provide specific cybercrime related objectives and clear means to achieve these goals Comprehensive data on cybercrime incidents and their impact are not available and without exact numbers on the current scope and prevalence of cybercrime it is difficult to evaluate the magnitude of the threats posed by cyber criminals There are a number of issues that have prevented the accurate measurement and tracking of cybercrime For one the lack of a clear sense of what constitutes cybercrime presents a barrier to tracking inclusive cybercrime data Additionally much of the available data on cybercrime is self reported and individuals or organizations may not realize a cybercrime has taken place or may elect for a host of reasons not to report it Policymakers may debate whether to direct a thorough evaluation of the threats posed by cyber criminals

Policing Cybercrime David S. Wall,Matthew Williams,2017-12-22

Cybercrime has recently experienced an ascending position in national security agendas world wide It has become part of the National Security Strategies of a growing number of countries becoming a Tier One threat above organised crime and fraud generally Furthermore new techno social developments in social network media suggest that cyber threats will continue to increase This collection addresses the recent inertia in both critical thinking and the empirical study of cybercrime and policing by adding to the literature seven interdisciplinary and critical chapters on various issues relating to the new generation of cybercrimes currently being experienced The chapters illustrate that cybercrimes are changing in two significant ways that are asymmetrical On the one hand cybercrime is becoming increasingly professionalised resulting in

specialists that perform complex and sophisticated attacks on computer systems and human users. On the other, the hyper connectivity brought about by the exponential growth in social media users has opened up opportunities to non specialist citizens to organise and communicate in ways that facilitate crimes on and offline. While largely distinct, these developments pose equally contrasting challenges for policing which this book addresses. This book was originally published as a special issue of Policing and Society.

Cyber Crime Matthew Richardson, 2019. Cyber Crime Law and Practice now in its second edition tackles the fast growing topic of cyber crime and covers a wide range of issues from electronic fraud, data interception of communications, cyber stalking, online theft and intellectual property to more involved topics like malicious communications and the rules of evidence relating to cyber crimes and computers. The second edition contains updated information on New Offences under the Computer Misuse Act 1990, Investigatory Powers Act 2016, Data Protection Act 2018 and GDPR and new CPS guidance on prosecution of offences relating to social media. Using detailed case studies, examples and statutory extracts, the author explains all aspects of cyber crime and computer crime. Cyber Crime Law and Practice provides a practical, easy to follow guide for practitioners in the field as well as those in law enforcement and academia.

Cybercrime in Nepal Prabin Subedi, 2015-08-24. Diploma Thesis from the year 2014 in the subject Law Comparative Legal Systems. Comparative Law University of Oslo course LLM ICTL language English abstract. Broadly, the thesis aims to resolve two research questions: Firstly, whether or not the legal regime of cybercrime in Nepal has been able to address current or prospective modus operandi of cyber related crime. And secondly, whether the Nepalese legal regime related to cybercrime is in line with the standards set forth in the Convention on Cybercrime 2001 for addressing the cybercrime. The dissertation is substantially based on secondary resources such as scholar's articles, books and data from police annual reports of court and informal unstructured discussion with personnel from relevant authorities. Furthermore, the thesis has undertaken empirical study of cases and reports along with unstructured interviews with relevant officials using random purposive sampling. After observation of secondary sources, unstructured interviews, the paper has used primary sources such as treaties and laws to make an analytical study where the findings have been analyzed and conclusions have been drawn.

Cybercrime in Progress Thomas J Holt, Adam M Bossler, 2015-12-14. The emergence of the World Wide Web, smartphones and computers has transformed the world and enabled individuals to engage in crimes in a multitude of new ways. Criminological scholarship on these issues has increased dramatically over the last decade as have studies on ways to prevent and police these offenses. This book is one of the first texts to provide a comprehensive review of research regarding cybercrime, policing and enforcing these offenses and the prevention of various offenses as global change and technology adoption increases the risk of victimization around the world. Drawing on a wide range of literature, Holt and Bossler offer an extensive synthesis of numerous contemporary topics such as theories used to account for cybercrime, policing in domestic and transnational contexts, cybercrime victimization and

issues in cybercrime prevention The findings provide a roadmap for future research in cybercrime policing and technology and discuss key controversies in the existing research literature in a way that is otherwise absent from textbooks and general cybercrime readers This book is an invaluable resource for academics practitioners and students interested in understanding the state of the art in social science research It will be of particular interest to scholars and students interested in cybercrime cyber deviance victimization policing criminological theory and technology in general **Cybercrime** United States.
