Cyclodextrins In Chromatography:

Cyclodextrins in Chromatography Tibor Cserhádi, Esther Forgacs, 2007-10-31 Cyclodextrins can form complexes with a wide variety of organic and inorganic compounds a property which can prove useful when trying to separate complex mixtures This book provides an up to date and critical evaluation of the application of cyclodextrins in many fields of chromatography including thin layer gas liquid high performance liquid and supercritical fluid chromatography capillary electrophoresis and isotacophoresis Whilst mainly practical in nature the book also looks briefly at the theoretical background for the various techniques Any professional working with chromatography will welcome this unique book as both a practical compilation of methods and a source of reference to the literature regarding the use and impact of cyclodextrins in chromatography

Modified Cyclodextrins for Chiral Separation Weihua Tang, Siu-Choon Ng, Dongping Sun, 2013-05-24 Modified Cyclodextrins for Chiral Separation offers a review of the latest advances in developing modified cyclodextrins as chiral selectors for various chromatographic and electromigration techniques Over the years many descriptions of chiral separation have appeared in academic journals and books but most of them have been devoted to either the development of analytical methods and protocols or the summary of different chiral selectors including cyclodextrins for chiral separation applications This is in marked contrast to this volume which focuses on the research endeavors concerning the development of cyclodextrin derivatives specifically as either chiral mobile phases for capillary electrophoresis or chiral stationary phases for various chromatographic techniques including gas chromatography or high performance liquid chromatography and supercritical fluid chromatography The ongoing thread in this book is the synthesis of structurally defined cyclodextrin derivatives and their applications in enantiomer separation by means of different analytical techniques Modified Cyclodextrins for Chiral Separation is intended for those who are interested in expanding their knowledge of cyclodextrin chemistry and chiral separation and in what cyclodextrin modification can be made to suit the needs of chiral selectors for different analytical techniques It primarily focuses on the state of the art cyclodextrin chemistry which is the basis for all chiral selectors used in these chiral separation techniques Weihua Tang PhD is a professor at the Key Laboratory of Soft Chemistry and Functional Materials Ministry of Education Nanjing University of Science and Technology China Siu Choon Ng PhD is a professor at the Division of Chemical and Biomedical Engineering School of Chemical and Biomedical Engineering Nanyang Technological University Singapore Dongping Sun PhD is a professor at the Key Laboratory of Soft Chemistry and Functional Materials Ministry of Education Nanjing University of Science and Technology China
