**Cytogenetics of Mammalian Embryonic Development** Andreï Pavlovich Dyban, V. S. Baranov, 1987 Chromosome anomalies are a major cause of embryonic mortality as well as of mental and physical defects but until very recently it has been almost impossible to understand the underlying causal mechanisms linking chromosomes and development In this book two eminent biomedical scientists explain how laboratory experiments with mice are finally revealing the molecular basis of gene expression in early development Comprehensive and up to date Dyban and Baranov's work is the first attempt to review the whole field by bringing together the important research being done in the United States the Soviet Union Britain and Germany *Experimental Approaches to Mammalian Embryonic Development* Janet Rossant, Roger A. Pedersen, 1988-11-25 Recent advances in the experimental analysis of the mammalian embryo are discussed from various scientific perspectives in this summary of major breakthroughs in embryonic development *The Soviet Journal of Developmental Biology*, 1989

in which a first attempt was made to bring together various disciplines to discuss advances of mammalian cytogenetics and to put them into proper context with the sciences of evolution and taxonomy The introductory remarks by V B Turrill to that symposium essentially an admonishment to be tolerant of the shortcomings of our respective disciplines would be a most appropriate beginning to this conference as well However the meeting held at Hanover was conceived more along the lines of remarks made by R B Seymour Sewall in his presidential address to the same society It has been said that scientists in this search for truth are nowadays too much concerned with the accumulation of facts and make too little use of their imagination in their attempts to explain such facts as they have accumulated In The continental drift theory and the distribution of the Copepoda *ibid* 166 149 1956 Tith this as a background two years ago we held the first of a series of loosely structured conferences on reproductive failure in the relaxing atmosphere of this small New England college community The manuscripts of that meeting have been published *Comparative Aspects of Reproductive Failure* Springer Verlag New York Inc 1967
