A Bridge That Work:

Bridge Employment Carlos-María Alcover, Gabriela Topa, Emma Parry, Franco Fraccaroli, Marco Depolo, 2014-04-16 With the long term trend toward earlier retirement slowing and the majority of older workers remaining in employment up to and beyond statutory retirement age it is increasingly important that we understand how to react to these changes Bridge employment patterns and activities have changed greatly over the past decade yet there is little information about the benefits of the various different forms this can take both for employees and employers This comparative international collection provides the first comprehensive summary of the literature on bridge employment bringing together experiences from Europe the United States Canada Australia and Japan It identifies the opportunities barriers and gaps in knowledge and practice whilst offering recommendations on how organisations and individuals can cope with future challenges in aging and work Written by international experts in the field each chapter also makes substantive and contextualized suggestions for public policy and organizational decision makers providing them with a roadmap to implement and integrate bridge employment into policies and practices designed to prolong working life a priority for workers organizations and societies in the coming decades This unique research handbook will be useful to a wide range of readers with an interest in the new concept of bridge employment and the extension of working life and of interest to researchers and practitioners in organizational behavior labor market analysis human resource management career development counselling occupational health social economy and public policy administration

Collecting and Managing Cost Data for Bridge Management Systems Paul D. Thompson, Michael J. Markow, 1996 This synthesis will be of interest to state department of transportation DOT administrators and mid to upper level managers researchers cost estimators bridge and general management system engineers and bridge design construction inspection and maintenance engineers as well as to private industry professionals involved in developing bridge management system BMS software and collecting and analyzing BMS cost data The state of the practice for collecting and managing cost data for BMS is described based on data obtained from a review of the literature and a survey of the state DOTs This report describes BMS cost data for work done by contract and in house forces for state and local governments It includes project level cost estimation as well as the collection and management of data for network level cost models The various cost estimate methods for replacement maintenance repair and rehabilitation and emergency work are analyzed as are the special requirements of user costs and other special economic data
