## **Dibecting The Heart:**

**Dissecting the Heart** Rosita Boland,2003 The subjects themselves in Rosita Boland s recent poems attest to her book s distinctive quality a series of museum and gallery exhibits the falconer s art an astronaut s wife the savage regime in Teheran and the unexpected places where love can be located lost and rediscovered Above all the author is interested in vital processes The collection fuelled by scientific enquiry and imaginative curiosity includes brief histories of our understanding of the human heart and brain In sequences and shorter lyrics poems waited for and patiently assembled Rosita Boland s lambent lines and stanzas extend the range of contemporary Irish poetry

**Recent Advances in Acute Type A Aortic Dissection** Ying-Fu Chen,Chwan-Yau Luo,Dominique Shum-Tim,2015-07-02 Type A acute aortic dissection TAAAD is an acute cardiovascular condition that is normally associated with genetic conditions such as Marfan Syndrome but it can also occur in patients with no known predisposing risk factors TAAAD is associated with extremely high mortality over 20% of documented cases in medical literature if not addressed on time Surgical management of TAAAD also varies tremendously depending on the causative pathology Techniques to manage TAAAD cover the entire spectrum of methods employed in cardiac surgery ranging from a simple replacement of the ascending aorta to aortic root sparing or replacement and an aortocoronary bypass to total arch and descending aortic stenting involving hypothermic circulatory arrest or other cerebral protection strategies New medical evidence suggests that concomitant intraoperative management of the arch and descending aorta minimizes the need for subsequent surgeries in patients who are operated upon for TAAAD Coupled with new diagnostic technology available to medical professionals better long term patient outcomes for TAAAD treatment are now a reality

**Recent Advances in Acute Type A Aortic Dissection** presents a collection of comprehensive reviews from many experts on TAAAD Cardiac surgeons can benefit from this volume by learning about current medical opinions and consensuses on risk factors including genetic predisposition diagnostic modalities intraoperative management surgical options cerebral protection strategies and long term follow up procedures on acute TAAAD

[Sex Differences in Heart Disease](#) Bohuslav Ostadal,Naranjan S. Dhalla,2020-11-15 Cardiovascular diseases are the leading cause of mortality in men and women Unfortunately women have traditionally been excluded from clinical trials and female animals have been used less or sex was not reported in basic research studies Until recently consideration of both sexes was not required in clinical and preclinical studies focusing on cardiovascular diseases However the number of clinical and experimental papers dealing with sex differences and heart disease significantly increases during the last years This trend is obviously the result of at least two facts the number of examples of different behavior of the male and female heart under physiological and

pathological conditions is steadily increasing and there were controversial reports on the beneficial and adverse effect of hormonal replacement therapy Detailed molecular and cellular mechanisms of these differences are still unknown but one is clear already today sex differences are so important that they should be considered by the selection of optimum diagnostic and therapeutic procedures in clinical practice The book presents 16 manuscripts on sex differences of heart disease as developed by several investigators the volume is organized in four parts Part I dealing with sex differences in cardiac ischemic injury includes 5 chapters on experimental aspects of cardiac ischemia reperfusion injury the role of testosterone and clinical aspects of ischemic heart disease Part II is devoted to sex differences in heart failure and includes four chapters Discussion in this part of the book is centered around the sex differences in heart failure due to volume overload Part III of this volume includes four papers on risk factors of cardiovascular diseases namely hypertension and obesity and finally three chapters in part IV deal with sex differences of cardiac mitochondria under different pathological conditions We believe this book will be very useful for cardiovascular scientists graduate students postdoctoral fellows and other health professionals
