

DIAMONDS AND DEFAULTS

Abstract: In a two-period model, agents trade a riskless bond and a risky asset. The risky asset is a claim on a random endowment of a consumption good. The endowment is subject to a random shock. The price of the risky asset is determined by the market clearing condition. The price of the riskless bond is determined by the market clearing condition. The price of the risky asset is determined by the market clearing condition.

Diamonds and Defaults Maarten de Rijke, 2013-11-11 This volume contains a selection of papers presented at a Seminar on Intensional Logic held at the University of Amsterdam during the period September 1990 May 1991 Modal logic either as a topic or as a tool is common to most of the papers in this volume A number of the papers are concerned with what may be called well known or traditional modal systems but as a quick glance through this volume will reveal this by no means implies that they walk the beaten tracks In deed such contributions display new directions new results and new techniques to obtain familiar results Other papers in this volume are representative examples of a current trend in modal logic the study of extensions or adaptations of the standard systems that have been introduced to overcome various shortcomings of the latter especially their limited expressive power Finally there is another major theme that can be discerned in the volume a theme that may be described by the slogan representing changing information Papers falling under this heading address long standing issues in the area or present a systematic approach while a critical survey and a report contributing new techniques are also included The bulk of the papers on pure modal logic deal with theoretical even foundational aspects of modal systems [Diamonds and Defaults](#) Maarten De Rijke, 2014-01-15

Reasons as Defaults John F. Horty, 2012-01-31 Although the study of reasons plays an important role in both epistemology and moral philosophy little attention has been devoted to the question of how exactly reasons interact to support the actions or conclusions they do In this book John F Horty attempts to answer this question by providing a precise concrete account of reasons and their interaction based on the logic of default reasoning The book begins with an intuitive accessible introduction to default logic itself and then argues that this logic can be adapted to serve as a foundation for a concrete theory of reasons Horty then shows that the resulting theory helps to explain how the interplay among reasons can determine what we ought to do by developing two different deontic logics capturing two different intuitions about moral conflicts In the central part of the book Horty elaborates the basic theory to account for reasoning about the strength of our own reasons and also about the related concepts of undercutting defeaters and exclusionary reasons The theory is illustrated with an application to particularist arguments concerning the role of principles in moral theory The book concludes by introducing a pair of issues new to the philosophical literature the problem of determining the epistemic status of conclusions supported by separate but conflicting reasons and the problem of drawing conclusions from sets of reasons that can vary arbitrarily in strength or importance

XML in 60 Minutes a Day Linda McKinnon, Al McKinnon, 2003-07-07 XML is now ubiquitous not just in Web development but as the underpinning of interactive Web services applications that really do run on any platform Includes twenty four one hour lessons that recreate a typical week long introductory seminar Provides readers with a sound fundamental understanding of XML and how it changes application development Explains how to use XML when dealing with transforms schemas and other Web services requirements The authors teach courses for IBM Canada Companion Web site

features an online presentation by the authors that follows along with each chapter and includes an audio only option for readers with dial up Internet connection
