

Opera was born in Italy towards the end of the 16th century, a new form of musical drama emerging out of the heated intellectual debates and experiments of the Camerata meeting at the house of Cosimo Barbi in Florence. Four hundred years later, it is flourishing as never before: the debate and experimentation are now international, and the passionate engagement and critical responses of audiences of both live and televised performances, as well as the huge sales of sound and video recordings, are witness of a following unprecedented in its history.

This new dictionary has over 4,500 entries, covering all aspects of the historical development and present standing of opera. The authors define their subject broadly, paying some attention to different ancient and modern dramatic forms and taking account also of some of the dramatic music that preceded the rise of the dramatic form of opera. There are traditional starting dates of opera. There are more than 750 articles on individual composers, the most important combining both narrative and critical accounts, supplemented by references and bibliographies. Six hundred operatic works of all kinds are described, with synopses, full premiere details, and, where relevant, a note of the first performance in Britain and the United States. Principal operatic roles and well-known arias, choruses, scenes, and interludes are identified in separate entries. Important sources of ideas for operas are given in 85 entries on historical characters such as Hans Sachs, Caesar, and Sappho; on mythical or legendary ones such as Orpheus and Faust; and on writers and poets, as varied as Goethe, Milton, and Henry James, whose works have provided direct inspiration. Details of librettists and their most important sources are given in many entries, in composer works, and in many separate biographies. Nearly 600 singers are featured, from the earliest experiments of the 1700s, with details of debut, style, reputation, roles created, and notable performances. There are biographies of the major conductors, producers, directors, designers, and entrepreneurs, complemented by separate histories of opera houses, companies, institutions, and festivals around the world.
