**Acronyms and Abbreviations** Николай Н. Слепов, 1999. **Dictionary of Acronyms and Technical Abbreviations** Jakob Vlietstra, 2012-12-06. This second edition contains a collection of technical abbreviations, acronyms, and identifiers in short terms that are used in information and communication technologies and other related areas. They have become part of the normal vocabulary in many industries, institutes, organizations, and universities. Too often they are used without mentioning what they stand for. The main area covered by this dictionary is Information and Communication Technology (ICT). This includes computer and communication hardware and software, communication networks, the Internet, and the World Wide Web, and automatic control. Other areas covered are ICT-related techniques, solutions, products, processes, and activities. The dictionary also contains symbolic names of organizations and institutions directly connected to the subjects listed above, as well as the abbreviated names of conferences, symposia, workshops, where the mentioned subject areas are treated. In some cases, the standard two-letter country codes are listed between parentheses at the end of every explained term, and the country where the term originated. This is a reference book that is important for all practitioners and users in the areas mentioned above. Technical publications often omit the meaning of terms and confront the reader with jargon, too often difficult to understand. Readers can use this book as a complete reference guide without having to guess what the letters of the terms stand for. This new edition contains close to 35,000 terms. Approximately ten thousand new items have been added. Obsolete and less relevant terms have been
