Dictionary of Organophosphorus Compounds R. Edmundson, 1987-11-19, **Organic Chemists Compounds Desk Reference** P. H. Rhodes, 1991-12-31 Information from many disparate sources is brought together to create a unique desktop guide to the principles and practice of organic chemistry *Organic Chemist's Desk Reference* Caroline Cooper, 2010-07-23 CHOICE Award Winner Since the first publication in 1995 the Organic Chemist's Desk Reference has been essential reading for laboratory chemists who need a concise guide to the essentials of organic chemistry the literature nomenclature stereochemistry spectroscopy hazard information and laboratory data The past fifteen years have witnessed immense growth in the field of chemistry and new discoveries have continued to shape its progress In addition the distinction between organic chemistry and other disciplines such as biochemistry and materials science has become increasingly blurred Extensively revised and updated this new edition contains the very latest data that chemists need access to for experimentation and research New in the Second Edition Rearranged content placed in a logical progressive order making subjects easier to find Expanded topics from the glossary now presented as separate chapters Updated information on many classic subjects such as mass spectrometry and infrared ultraviolet and nuclear magnetic resonance spectroscopy New sections on chiral separations and crystallography Cross references to a plethora of web information Reflecting a 75% revision since the last edition this volume is a must have for organic chemists and those in related fields who need quick and easy access to vital information in the lab It is also a valuable companion to the Dictionary of Organic Compounds enabling readers to easily focus in on critical data *Information Sources in Chemistry* R. T. Bottle, J. F. B. Rowland, 2011-12-01 The aim of each volume of this series Guides to Information Sources is to reduce the time which needs to be spent on patient searching and to recommend the best starting point and sources most likely to yield the desired information The criteria for selection provide a way into a subject to those new to the field and assists in identifying major new or possibly unexplored sources to those who already have some acquaintance with it The series attempts to achieve evaluation through a careful selection of sources and through the comments provided on those sources **The New Walford Guide to Reference Resources** Ray Lester, 2005 The New Walford highlights the best resources to use when undertaking a search for accurate and relevant information saving you precious time and effort For those looking for a selective and evaluative reference resource that really delivers on its promise look no further In addition to print sources The New Walford naturally covers an extensive range of e reference sources such as digital databanks digital reference services electronic journal collections meta search engines networked information services open archives resource discovery services and websites of premier organizations in both the public and private sectors But rather than supplying a list of all available known resources as a web search engine might The New Walford subject specialists have carefully selected and evaluated available resources to provide a definitive list of the most appropriate and useful With an emphasis on quality and sustainability the subject specialists have been careful to

assess the differing ways that information is framed and communicated in different subject areas As a result the resource evaluations in each subject area are prefaced by an introductory overview of the structure of the relevant literature This ensures that The New Walford is clear easy to use and intuitive Publisher **Walford's Guide to Reference Material: Science and technology** Albert John Walford, Library Association, 1999 A core resource for the identification and evaluation of reference materials cited in BCL3 and Sheehy While the majority of items are books periodical articles microforms and online and CD ROM sources are also represented This revised and updated volume includes many 1998 publications as possible together with some items published early in 1999 Some 700 items have been added bringing the total to 7 594 No schedule is given for publication of volumes 2 and 3 but presumably the complete project will follow three year cycle established with previous editions **World Databases in Chemistry** C. J. Armstrong, 1996 The easy to use format provides information on both the database itself and the data providers with all the details necessary to identify the source that best matches the needs of information specialists online searchers and researchers working in this field **Chronolog**, 1991 **Choice**, 1989 *Guide to Reference Books* Robert Balay, Vee Friesner Carrington, Murray S. Martin, 1996 Presents an annotated bibliography of general and subject reference books covering the humanities social and behavioral sciences history science technology and medicine *Phosphorus* D. E. C. Corbridge, 1990 This latest edition extends the coverage of the 1985 edition which was described as a remarkably comprehensive and well refined survey of all aspects of the chemistry of phosphorus Journal of Applied Crystallography Since then the importance and relevance of phosphorus compounds has continued to increase over ever widening fields of science and technology The aims of this greatly expanded fourth edition remain the same to deal with the basic material and to highlight more recent advances The book has been extensively revised and much of the material which has been added is from the literature covering the period from mid 1984 to mid 1989 There is no other book with such a comprehensive and up to date coverage of the whole realm of phosphorus chemistry It is an ideal starting point for anyone entering the field and wishing to acquire a specialised knowledge of the subject Like its predecessors it continues to be invaluable as a source book for post graduate specialised courses *Encyclopedia of Chemical Technology: Paper to Pigment dispersions*, 1996 **Library Journal**, 1987 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately *Reference Sources in Science, Engineering, Medicine, and Agriculture* Harold Robert Malinowsky, 1994-06-21 Thoughtfully compiled current and reasonably priced Recommended as a one stop shopping source Library Journal This work is an essential purchase for libraries with collections in the four designated areas ARBA Both print and nonprint sci tech information sources can be quickly located and their uses evaluated with this new resource the only sourcebook to cover all four major branches of science More than 2 400 entries of complete bibliographic information are accompanied by a brief description of each work Every source is indexed by author subject and title Special chapters cover
