Diamonds Are Red:

Red Diamonds Justin McCarthy, 1894 The Connoisseur ,1930 **The American Shorthorn Herd Book** ,1913

The Diamond Formula Amanda S. Barnard, 2000 Provides a gemmologist gemmological or mineralogical student or interested party with an overview of the synthesis of diamonds This book begins with the history of diamond synthesis and the theories on which much of the early work was based before discussing the principles on which the modern processes rely

The American Short-horn Herd Book Lewis Falley Allen, William T. Bailey, 1908 **Diamond Facts** Amelia

Khatri, AI, 2025-02-18 Diamond Facts explores the captivating journey of diamonds from their geological origins to their profound impact on human history and culture bridging the gap between scientific understanding and historical significance These coveted gems begin their life deep within the Earth's mantle forged under intense pressure and heat later rising to the surface through volcanic activity The book also examines the unique chemical compositions and crystal structures that give diamonds their exceptional hardness and brilliance qualities that have captivated humanity for centuries The book traces the historical journey of diamonds from ancient India to their prominent role in royal regalia and modern jewelry highlighting how they have shaped economies and influenced geopolitical dynamics The narrative explores the evolution of diamond cutting techniques the rise of the diamond trade and the ethical considerations surrounding diamond mining and distribution Structured in three parts it first introduces the geological origins then explores historical significance and finally delves into the modern diamond industry examining ethical considerations and future exploration This book uniquely integrates scientific rigor with historical narrative offering a comprehensive account suitable for science enthusiasts history buffs and anyone curious about the multifaceted world of diamonds It draws upon scientific research historical records and economic data supported by visual aids to present a balanced perspective on the natural science and history of these precious stones

Optical Properties of Diamond A.M. Zaitsev, 2013-03-09 The unique properties of diamond are responsible for its pre-eminence as a gemstone and give it a glamour and attraction unprecedented for any other mineral As the first member of group IV of the periodic table of elements carbon in its crystalline form as diamond has also fascinated scientists for at least 300 years Many experimental techniques have been employed in the study of diamond and of these optical spectroscopy has proven one of the most fruitful The absorption line at 415 nm characteristic of Cape Yellow diamonds was first documented by Walter in 1891 Further work on this absorption now known as N3 by the Indian school under Sir C V Raman in the 1930s and 1940s led to a basic understanding of the system which they observed in both absorption and luminescence The N3 center is a structural defect in the diamond and the absorption of light occurs by exciting electrons in this defect from one well defined energy state to another When the electron returns to the original energy level luminescence is produced Detailed studies of natural diamonds over the subsequent 60 years have discovered large numbers of absorption and emission lines characteristic of different defects In 1904 Sir William Crookes showed that a colorless diamond could be
