**Dictatorship Over Needs** Ferenc Fehér, Agnes Heller, György Márkus, 1983-01 Dictatorship over needs : an analysis of soviet societies Ferenc Fehér, Ágnes Heller, György Márkus, 1984 In Marx's Shadow Costica Bradatan, Serguei Oushakine, 2010-03-19 Despite its key role in the intellectual shaping of state socialism Communist ideas are often dismissed as mere propaganda or as a rhetorical exercise aimed at advancing socialist intellectuals on their way to power By drawing attention to unknown and unexplored areas trends and ways of thinking under socialism the volume examines Eastern Europe and Russian histories of intellectual movements inspired negatively as well as positively by Communist arguments and dogmas Through an interdisciplinary dialogue the collection demonstrates how various bodies of theoretical knowledge philosophical social political aesthetic even theological were used not only to justify dominant political views but also to frame oppositional and nonofficial discourses and practices The examination of the underlying structures of Communism as an intellectual project provides convincing evidence for questioning a dominant approach that routinely frames the post Communist intellectual development as a revival or at least as a return of the repressed intellectual traditions As the book shows the logic of a radical break suggested by this approach is in contradiction with historical evidence a significant number of philosophical theoretical and ideological debates in post Communist world are in fact the logical continuation of intellectual conversations and confrontations initiated long before 1989 *Towards a Radical Democracy (Routledge Revivals)* Douglas Brown, 2013-12-19 Originally published in 1988 this is the first systematic account of the writings of Hungarian dissidents and former students of George Lukacs collectively known as the Budapest School Dr Brown demonstrates the importance of their work in contributing to a logically consistent yet realistic theory of socialist mixed economies and genuine radical democracies The Budapest School s model of radical democracy represents a critique of both industrial capitalism and existing socialist systems with immediate political as well as philosophical importance Dr Brown is particularly concerned to draw out its significance for the practical realities of political economy and the logical implications for desirable reform of Western mixed economies Zygmunt Bauman and the West Jack Palmer, 2023-07-15 Zygmunt Bauman was both an outsider of Western modernity and one of its foremost interpreters He was an exemplary figure in twentieth century intellectual work on exile who experienced both Nazi and Soviet forms of totalitarianism The first work to draw extensively on Bauman s personal archive *Zygmunt Bauman and the West* argues that the distinctive social thought that sprang from Bauman s lived experiences of exile amounts to a sustained sophisticated and hitherto unappreciated problematization of Eurocentrism and the West Through an overview of the intellectual s thought and his contribution to sociology Jack Palmer explores Bauman s experience and interpretation of the West and seeks to understand his work in a broader context outside of the Eurocentric environment from which it was born Intervening in a resurgent sociology of intellectuals *Zygmunt Bauman and the West* re evaluates the place of the West in social and political thought

Doomsday or Deterrence? Ferenc Fehér, Agnes Heller, 2018-10-24

Doomsday or Deterrence argues against the majority of premises and conclusions of the antinuclear argument as existed in 1986 when this study was first published Fehér and Heller's study claims that social changes are important to curb technology trends that lean toward the construction of nuclear weapons as well as using the West as its own value that needs to be defended and emphasising the importance of understanding the true feelings behind the antinuclear argument This title will be of interest to students of politics and international relations

**Rethinking the Soviet Collapse** Michael Cox, 1998 One of the great issues still facing modern commentators is why they failed to anticipate the end of the Cold War in the late 1980s This book composed of original essays written by leading scholars from both sides of the Atlantic explores this vexed problem by means of a critical interrogation of Soviet studies perhaps the most controversial and certainly the most policy relevant of all academic disciplines during the era of superpower conflict To some now little more than a footnote in the intellectual history of the post war period Soviet studies for over forty years played a key role in shaping the West's understanding some would say misunderstanding of the nature of the Soviet system But how fair are the charges now levelled against those whose task it once was to explain the strengths and weaknesses of the USSR How far should they be held responsible for failing to forecast the demise of the Soviet Union and the end of the Cold War And how much better have the experts done in explaining the dynamics of post communist Russia These are at least three of the large questions this innovative book seeks to answer
