Dictionary Of Africanisms:

A Dictionary of Africanisms Gerard M. Dalgish, 1982-10-28 Product information not available **Africanisms in Afro-American Language Varieties** Salikoko S. Mufwene, Nancy Condon, 1993 For review see Daniel J Crowley in New West Indian Guide Nieuwe West Indische Gids vol 70 no 1 p 188 190 Glocal English Farooq A. Kperogi, 2015-06-22 Glocal English compares the usage patterns and stylistic conventions of the world's two dominant native varieties of English British and American English with Nigerian English which ranks as the English world's fastest growing non native variety courtesy of the unrelenting ubiquity of the Nigerian English language movie industry in Africa and the Black Atlantic Diaspora Using contemporary examples from the mass media and the author's rich experiential data the book isolates the peculiar structural grammatical and stylistic characteristics of Nigerian English and shows its similarities as well as its often humorous differences with British and American English Although Nigerian English forms the backdrop of the book it will benefit teachers of English as a second or foreign language across the world Similarly because it presents complex grammatical concepts in a lucid personal narrative style it is useful both to a general and a specialist audience including people who study anthropology and globalization The true life experiential encounters that the book uses to instantiate the differences and similarities between Nigerian English and native varieties of English will make it valuable as an empirical data mine for disciplines that investigate the movement and diffusion of linguistic codes across the bounds of nations and states in the age of globalization **Dictionaries**, 1991 **A Catholic dictionary, by W.E. Addis and T. Arnold** William Edward Addis, 1884 **The Blackwell Dictionary of Modern Social Thought** William Outhwaite, 2008-04-15 Modern social thought ranges widely from the social sciences to philosophy political theories and doctrines cultural ideas and movements and the influence of the natural sciences Provides an authoritative overview of the main themes of social thought Long essays and entries give full coverage to each topic Covers major currents of thought philosophical and cultural trends and the individual social sciences from anthropology to welfare economics New edition updates about 200 entries and includes new entries suggestions for further reading and a bibliography of all sources cited within the text A Catholic Dictionary William E.. Addis, Thomas Arnold (historien).), 1884 **African Roots/American Cultures** Sheila S. Walker, 2001 Africans and their descendants constituted the majority of the population of the Americas for most of the first three hundred years Yet their fundamental roles in the creation and definition of the new societies of the New world and their significance in the development of the Atlantic world have not been acknowledged This multidisciplinary volume highlights the African presence throughout the Americas and African and African Diasporan contributions to the material and cultural life of all of the Americas and of all Americans It includes articles from leading scholars and from cultural leaders from both well known and little known African Diasporan communities Privileging African Diasporan voices it offers new perspectives data and interpretations that challenge prevailing understandings of the Americas Its fundamental premise is that the story of the

Americas can only be accurately told by including the story of the foundational roles played by Africans and their descendants in the Americas

Traveling Conceptualizations Andrea Hollington, 2015-08-15 *Traveling Conceptualizations* is a monograph which is concerned with African cultural conceptualizations in Jamaica. It contributes to the study of Transatlantic relations between Africa and Jamaica and in particular to the understanding of African influences in Jamaican linguistic practices. The book constitutes a first study of these phenomena from a cognitive linguistic perspective and investigates traveling conceptualizations at the intersection of language, culture and cognition. The author explores Jamaican linguistic practices in different domains, namely conceptualizations involving parts of the human body, conceptualizations of events, roles and relations underlying serial verb constructions and conceptualizations of kinship and names. The study can be regarded as an innovative contribution as it looks not only at linguistic expressions on the surface but discusses the underlying cultural and cognitive basis of semantic structures. The study thus aims at making African-Jamaican connections on the conceptual level visible and also discusses notions of consciousness, agency and emblematicity
