Acquisition Of Scrambling And Cliticization:

The Acquisition of Scrambling and Cliticization S.M. Powers,C. Hamann,2013-04-17 This collection of papers investigates two specific linguistic phenomena from the point of view of first and second language acquisition While observations on the acquisition of scrambling or pronominal clitics can be found in the literature up until the recent past they were sparse and often buried in other issues This volume fills a long existing gap in providing a collection of articles which focus on language acquisition but at the same time address the overarching syntactic issues involved for example the X bar status of clitics base generation vs movement accounts of scrambling This volume contains an overview of L1 and in one case L2 acquisition data from a number of different languages including Bernese Swiss German Dutch English French German Italian Spanish and Swedish as well as from several theoretical points of view with these two clause internal processes at its center These language acquisition data are considered to be crucial in the validation of analyses of these specific linguistic phenomena in adult grammars The contributions in this volume include the earliest thoughts in this vein and for this reason should be viewed as a starting point for discussions within theoretical linguistics and language acquisition alike *The Acquisition of Direct Object Scrambling and Clitic Placement* Jeannette C. Schaeffer,2000-11-13 This book offers a new contribution to the debate concerning the real time acquisition of grammar in First Language Acquisition Theory It combines detailed and quantitative observations of object placement in Dutch and Italian child language with an analysis that makes use of the Modularity Hypothesis Real time development is explained by the interaction between two different modules of language namely syntax and pragmatics Children need to build up knowledge of how the world works which includes learning that in communicating with someone else one must realize that speaker and hearer knowledge are always independent Since the syntactic feature referentiality can only be marked if this pragmatic distinction is made and assuming that certain types of object placement such as scrambling and clitic placement are motivated by referentiality it follows that the relevant syntactic mechanism is dependent on the prior acquisition of a pragmatic distinction *Pronouns and Clitics in Early Language* Pilar Larranaga,Pedro Guijarro-Fuentes,2012-08-31 Traditional grammars have stated that clitics are subject or object pronouns whose distributional features make them different from personal pronouns This book focuses on the acquisition of personal and demonstrative pronouns as well as clitics with respect to determinative phrases in a variety of languages of the Romance family and several indigenous languages such as Quechua A particularly original aspect of the present volume is that it not only addresses syntactic issues but also semantic and pragmatic questions that have been widely neglected in the literature It also reports on acquisition data of languages such as Quechua which have not attracted the attention of researchers until very recently *The Expression of Negation* Laurence R. Horn,2010 Negation is at the core of human language without negation there can be no denial contradiction irony or lies This book examines the form and function of negative sentences in a variety of languages and offers state of the art surveys of the acquisition of negation by

children its processing by adults its historical development and its interaction with other operators and predicates within natural language sentences Topics covered include the nature of negative polarity the phenomenon of pleonastic or illogical negation and the role of morphological syntactic semantic pragmatic Issues in the Theory of Language Acquisition Norbert Dittmar,Zvi Penner,1998 This book offered in tribute to Jurgen Weissenborn brings together ten original contributions from a variety of disciplinary backgrounds to cover key issues in current research on language acquisition Jurgen Weissenborn is Professor for Psycholinguistics at the University of Potsdam Germany After having worked in the fields of semiotics computational linguistics and language and space for many years Jurgen Weissenborn s current research focusses on learnability issues in language acquisition and the emergence of grammatical knowledge in the earliest developmental stages Weak Referentiality Ana Aguilar-Guevara,Bert Le Bruyn,Joost Zwarts,2014-12-15 This volume brings together studies in the domain of weak referentiality the phenomenon that a definite or indefinite noun phrase lacks its usual referential force Several papers investigate syntactic or semantic properties of indefinite noun phrases such as modality number neutrality narrow scope incorporation predication and case marking and that in a range of languages Arabic Brazilian Portuguese Catalan German Papiamentu Russian Other papers deal with weakly referential definite noun phrases in various languages Basque Dutch English French involving scrambling modification possession and accessibility The papers demonstrate a range of empirical methods and theoretical models This volume will not only be of interest to researchers and students in syntax and semantics but also in psycholinguistics and language typology **Advances in Greek Generative Syntax** Melita Stavrou,Arhonto Terzi,2005-05-19 This collection of original research focuses on various lesser studied aspects of Greek syntax The articles combine a sound empirical coverage within current developments of generative theory and cover a wide spectrum of areas The syntax of sentential structure is dealt with by two articles one is an extensive analysis of the distribution of goal and beneficiary dative DPs in Greek and cross linguistically and the other addresses the relation agree in small clauses and between adjectives and nouns Two articles study the acquisition of the left periphery and of eventivity and one focuses on the historical evolution of participles in Greek out of which gerunds emerged The syntax and semantics of wh clauses in DP positions and of the non volitional verb *elo* are the focus of two articles situated in the syntax semantics interface The DP domain is approached by two theoretical articles one on a Greek possessive adjective and another on determiner heads The final contribution studies the acquisition of the Greek definite article **The Acquisition of Clitics in Croatian and Spanish and Its Implications for Syntactic Theory** Andrea Stiasny,2006 Acquisition at the Interfaces Roberta Tedeschi,2009 **Movement and Clitics** Linda Escobar,Vicenç Torrens,2010-01-08 This volume gathers selected papers from the workshops Facing Movement and Meeting Clitics held in the context of the Barcelona Linguistic Institute The authors explore a wide variety of languages from Icelandic to Mayan from Japanese to Russian and Italian from various data sources adult grammar first and second language acquisition

developmental language disorders and language change The papers on movement address the issues of reconstruction in parasitic gaps the alternation between short and long distance movement in Germanic subextraction from subjects wh in situ in Greek word order alternations derived by movement in bilingual acquisition intervention effects in L2 acquisition of Chinese multiple wh fronting in L2 and production of wh questions in L1 L2 and SLI in French In the papers on clitics the theoretical issues considered include the affixal character of subject clitics in L1 the morphological complexity of clitics proclisis versus enclisis the restrictions on cooccurrence of clitics in causative and other constructions clitic placement in relation to L2 and language change clitics as demarcative markers and the acquisition of pronominal clitics in European Portuguese

Functional Categories in Language Acquisition Annette Hohenberger,2002 This study investigates the acquisition of Functional Categories from the perspective of self organization Syntax emerges through a major bifurcation of the dynamical language system Dynamical notions such as precursor oscillation symmetry breaking and trigger are explanatory tools for the dynamics of early child language as evidenced in the acquisition of compounding case marking finiteness V2 wh questions etc The book addresses researchers from various theoretical camps generative functional connectionist by giving new answers to old questions in the light of a novel challenging theory self organization

From Syntax to Discourse C.

Hamann,2002-01-31 This book investigates typical phenomena of early child language from a cross linguistic perspective The investigation centers on the acquisition of pronominal clitics in production and comprehension and especially on the well known phase of infinitive production and subject omission Other areas such as early negation and question formation are treated in the context of the above phenomena The book provides a unique comparative database for these areas of language acquisition from the point of view of Romance and Germanic languages in presenting results on Danish Dutch English French German and other languages On the basis of these broad and detailed empirical results the author proceeds to evaluate current models and hypotheses advanced for the above phenomena from a theoretical perspective A formal investigation of the semantics and pragmatics of pronouns and tense leads to the conclusion that discourse anchorage which is problematic for young children is mediated by syntax and by functional material in particular so that the development of the syntax discourse interface is largely driven by developments in syntax In relating unusually comprehensive cross linguistic child data to unusually fine grained formal analyses the book thus succeeds in providing new insights not only into language

development but also into linguistic theory Features, Categories and the Syntax of A-Positions E. Haeberli,2002-08-31
This book investigates various aspects of the distribution of nominal arguments and in particular the cross linguistic variation that can be found among the Germanic languages in this domain of the syntax The empirical topics discussed include variable vs fixed argument order the distribution of subjects with respect to adjuncts expletive constructions and oblique subjecthood These are analyzed within a theoretical framework which is based on the Minimalist Program A Bibliography of Writings on the Acquisition of First Language ,2001 Proceedings from the Main Session of the Chicago Linguistic Society's ...
