Act And The Actor Making The Self:

The Act and the Actor Harold Rosenberg,1970 *Act and the Actor* Harold Rosenberg,1970 The author explores the threat posed by the replacement of individual identity and action by deliberately created collective actors *The Making of International Status* Marina Duque,Lecturer in International Politics Marina Duque,2026-01-07 The International Making of Status uses network analysis to explain how countries achieve status and respect in the international system Marina Duque traces the roots of international hierarchies through the formative nineteenth century demonstrating that status depends on patterns of state relations rather than on a state s material capabilities and revealing the ways in which status distinctions have legitimized inequality with imperialist philosophy As such the book places status at the heart of international politics diplomacy and security [Understanding the Self](#) Richard Stevens,1996-02-27 *Understanding the Self* offers a stimulating analysis of the different aspects of personal being and the theoretical perspectives related to them This book will be of interest to academics and students in psychology and social psychology **International Organizations as Self-directed Actors** Joel E. Oestreich,2012 This text illustrates and advances the argument that International Organizations IOs need to be taken seriously as actors in world affairs The text examines recent theories that suggest how IOs are able to set their own policies and implement them in meaningful ways **Cultivating Curious and Creative Minds** Cheryl J. Craig,Louise F. Deretchin,2011-02-16 *Cultivating Curious and Creative Minds* presents a plethora of approaches to developing human potential in areas not conventionally addressed Organized in two parts this international collection of essays provides viable educational alternatives to those currently holding sway in an era of high stakes accountability Taken together the chapters in Part I of *Cultivating Curious and Creative Minds* provide a sampling of what the cultivation of curious and creative minds entails The contributing authors shed light on how curiosity and creativity can be approached in the teaching domain and discuss specific ideas concerning how it plays out in particular situations and contexts **Willem De Kooning** Sally Yard,2007 A leading figure in the emergence of abstract expressionist painting in New York Willem de Kooning arrived in the United States in 1926 as a twenty two years old stowaway from Holland during the Depression years he was a dedicated visitor to the museums and galleries of Manhattan and did a brief stint as a WPA painter which was curtailed because he was not a citizen With resolute determination de Kooning ventured beyond the radical departures of cubism toward the visceral physicality of the abstractions that comprised his first one person exhibition in 1948 Five years later an exhibition of women painted in aggressive lashing gestures stunned contemporaries not only for the vehemence of the artist s attack but also for the evident reversal of direction yet across six decades the alternation and intertwining of abstraction and figuration remained fundamental to de Kooning s work 130 illustrations **Sociocybernetic Paradoxes** R. Felix Geyer,Johannes van der Zouwen,1986-07 In this stimulating work thirteen distinguished scholars examine and aim to reconcile the paradox that social systems tend to steer themselves with the knowledge that they are at the same time subject to steering and control

from outside Sociocybernetics is the term they have coined to describe the tools used in the analysis of this paradox tools which have themselves evolved from and influenced cybernetics and general systems theory Sociocybernetic Paradoxes surveys both the possibilities and limitations of cybernetics in the analysis and treatment of social problems Part One looks at concrete experiences of the steering of specific social systems Part Two examines the planning hierarchy and views of soci
