ESOP ..., 1990 Action Semantics-Directed Prototyping Kyung-Goo Doh, David A. Schmidt, 1992 Abstract We present a methodology based on Mosses Watt's action semantics for compiler synthesis Each action in action semantics is assigned specific analysis functions such as a typing function and a binding time function When a language is given an action semantics the typing and binding time functions for the individual actions compose into typing and binding time analyses for the language these are implemented as the type checker and static semantics processor respectively in the synthesized compiler Other analyses can be similarly formalized and implemented We show a sample language semantics and its synthesized compiler and we describe the compiler synthesizer that we have developed *Programming Language Syntax and Semantics* David Anthony Watt, Muffy Thomas, 1991 Contains a treatment of syntax and semantics and coverage of several complementary semantic methods with emphasis on using formal specification There is brief coverage of underlying theory and an introduction to action semantics a new method of specifying semantics **The Semantics of -mentum, -bulum, and -culum** Edmund Dresser Cressman, 1915 *Semantic Prototyping: Implementing Action Semantics in Standard ML*.
