Activation Of Energy Helen Kurt Wolff:

Many Layers of Ecocentrism Abhik Gupta, 2024-06-17 This book unveils the myriad streams of ecocentric thoughts that have been flowing through the human mind in indigenous communities in the wisdom of philosophers in the creative expressions of poets and writers sometimes latent but sometimes more explicit The strength of this book lies in the fact that it attempts to show that ecocentrism had not emerged suddenly as a distinct line of philosophical thought or found its place among the various normative approaches toward nature but the seeds of ecocentrism had always been running through human societies Thus this book not only emphasizes the unity of life but also reveals the inherent unity of all hues of ecocentrism The book adopts a multidisciplinary approach which is essential to dwell on a topic like ecocentrism which permeates the domains of disciplines as disparate as science philosophy religion normative ethics myths and folklore poetry and literature among others Despite this eclectic approach the book attempts to maintain continuity among the chapters and present these concepts in a simple form that will be easily accessible by readers from all conceivable backgrounds This book would be useful to the students researchers and faculty from the fields of ecology and environmental science philosophy sociology religious studies and literature It will also be an indispensable companion for all nature lovers activists and general readers interested in the emergence and evolution of environmental thoughts Religious Books and Serials in Print 1978-1979 R.R. Bowker Company. Department of Bibliography, 1978-11 **Toward Gog and Magog Or?** Franklin W. W. Osinski, John Ohliger, Colleen McCarthy, 1972 **Activation of Energy** Pierre Teilhard de Chardin, 1972-10-18 The renowned Jesuit thinker explores science theology and the course of human evolution Following in the footsteps of his earlier works this collection of essays from Pierre Teilhard de Chardin brings greater clarity to the stunning potential of human energy if it is properly channeled as he describes upward and outward While energy wrongly directed appears as depression drug addiction and violence this legendary scholar a priest who earned a doctorate in geology and studied the sciences extensively promises that spiritual energy channeled correctly will become a true force in the universe far outdistancing the potential of technological advance Like other great visionary poets Blake Hopkins Yeats Teilhard engages the reader both intellectually and sensually The Washington Post Book World **Cybertheology** Antonio Spadaro, 2014-09-19 Because the Internet has changed and is changing the ways in which we think and act it must also be changing the ways in which we think Christianity and its theology Cybertheology is the first book to explore this process from a Catholic point of view Drawing on the theoretical work of authors such as Marshall McLuhan Peter Levy and Teilhard de Chardin it questions how technologies redefine not only the ways in which we do things but also our being and therefore the way we perceive reality the world others and God Does the digital revolution affect faith in any sense Spadaro asks His answer is an emphatic Yes But how then are we to live well in the age of the Internet Spadaro delves deeply into various dimensions of the impact of the Net on the Church and its organization on our understanding of revelation grace liturgy the sacraments and other classical

theological themes He rightly points out that the digital environment is not merely an external instrument that facilitates human communication or a purely virtual world but part of the daily experience of many people a new anthropological space that is reshaping the way we think know and express ourselves Naturally this calls for a new understanding of faith so that it makes sense to people who live and work in the digital media environment In developing the notion of cybertheology Spadaro seeks to propose an intelligence of faith intellectus fidei in the era of the Internet The book s chapters include reflections on man the decoder and the search engines of God networked existence and the mystical body hacker ethics and Christian vision sacraments and virtual presence and the theological challenges of collective intelligence **The New York Times**
