Active English Two Active English:

English MPs Michael W. McCahill, 2023-01-26 What was the role of elected legislators Was it to represent the opinions of constituents or to vote according to their informed opinions reflecting the needs of the kingdom Most authorities have accepted Edmund Burke s depiction of 18th century MPs insisting it was their right to form their opinions without reference to the instructions of constituents This study provides answers to these important questions and in doing so reveals that Burke s vision does not represent how the House of Commons functioned during the last two decades of the 18th century Rather than focusing on specific issues or demographic groups English MPs brings to the fore the legislative activity of a broad segment of late 18th century English MPs This book shows they were diligent legislators who attended to the needs of constituents in the process developing strong connections with them It demonstrates that these connections did not rest on shared beliefs in reformist ideologies except in and around the metropolis Instead they grew out of the members timely and effective tending session after session to the host of measures brought forward by constituents and neighbours McCahill explores in fascinating detail the consequences of this bond In this book McCahill draws from an impressive array of primary sources and secondary literature to combine a structural analysis with broad surveys and detailed case studies The result is an illuminating and a comprehensive account of the House of Commons between 1760 and 1790 *Proceedings of the Seventeenth Annual Conference of the Cognitive Science Society* Cognitive Science Society (U.S.). Conference, 1995 This volume features the complete text of all regular papers posters and summaries of symposia presented at the 17th annual meeting of the Cognitive Science Society
