Activism And The Policy Procehb:

Activism and the Policy Process Anna Yeatman,2020-07-29 Activists protecting rainforests demanding increased childcare developing local community housing campaigning for AIDS funding or protecting consumers are as much part of the political landscape as the media parliament peak industry groups political parties or trade unions This collection explores the idea of policy activism and its relationship to the processes that not only set but implement and deliver the policy agenda Policy activists operate both inside and outside government They include community based organisers activist bureaucrats service providers and professionals Policy activism has been barely explored in existing literature This collection puts the idea on the map It is an innovative contribution to the literature using case studies across a broad range of policy areas This volume opens the window on an aspect of the policy process that rarely receives attention from students of politics or policy anywhere across the globe The framework presented and the cases included in these pages provide a glimpse of the workings of a complex democracy describing a range of actors responding creatively to the dynamics of social political and economic change It is fascinating to see how policy functions and social values appear to be more important to these processes than the formal structures of the government in which they are placed Beryl A Radin Professor of Public Administration and Policy State University of New York at Albany

No Child Left Behind and the Transformation of Federal Education Policy, 1965-2005 Patrick J. McGuinn,2006 Education is intimately connected to many of the most important and contentious questions confronting American society from race to jobs to taxes and the competitive pressures of the global economy have only enhanced its significance Elementary and secondary schooling has long been the province of state and local governments but when George W Bush signed into law the No Child Left Behind Act in 2002 it signaled an unprecedented expansion of the federal role in public education This book provides the first balanced in depth analysis of how No Child Left Behind NCLB became

law Patrick McGuinn a political scientist with hands on experience in secondary education explains how this happened despite the country's long history of decentralized school governance and the longstanding opposition of both liberals and conservatives to an active reform oriented federal role in schools His book provides the essential political context for understanding NCLB the controversies surrounding its implementation and forthcoming debates over its reauthorization how the struggle to define the federal role in school reform took center stage in debates over the appropriate role of the government in promoting opportunity and social welfare He places the evolution of the federal role in schools within the context of broader institutional ideological and political changes that have swept the nation since the 1965 Elementary and Secondary Education Act chronicles the concerns raised by the 1983 report A Nation at Risk and shows how education became a major campaign issue for both parties in the 1990s McGuinn argues that the emergence of swing issues such as education can facilitate major policy change even as they influence the direction of wider political debates and partisan conflict McGuinn traces the Republican shift from seeking to eliminate the U S Department of Education to embracing federal leadership in school reform then details the negotiations over NCLB the forces that shaped its final provisions and the ways in which the law constitutes a new federal education policy regime against which states have now begun to rebel and that only by understanding the unique dynamics of national education politics will reformers be able to craft a more effective national role in school reform

Courts, Politics, and the Judicial Process Christopher E. Smith, 1997 This reorganized and updated text provides a comprehensive examination of the American judicial system by describing and analyzing political influences on courts structure procedures decision making processes and consequences for society Professor Smith focuses on courts rather than on law because of the recognition that the content of law often depends on the composition of the judiciary citizens access to the judicial process and judicial decision making procedures This revealing study of the courts challenges the myths and popular perceptions about law and justice in American society and covers unique topics such as court bureaucracy subordinates influences on judges decisions and social science approaches to decision making

Popular Government and the Supreme Court Lane V. Sunderland, 1996 With quiet eloquence Lane Sunderland argues that we must reclaim the fundamental principles of the Constitution if we are to restore democratic government to its proper role in American life For far too long he contends the popular will has been held in check by an overly powerful Supreme Court using non constitutional principles to make policy and promote its own political agendas His work shows why this has diminished American democracy and what we can do to revive it Sunderland presents a strong thoughtful challenge to the constitutional theories promoted by Ronald Dworkin Archibald Cox Richard Epstein Michael Perry John Hart Ely Robert Bork

Philip Kurland Laurence Tribe Mark Tushnet and Catharine MacKinnon an enormously diverse group united by an apparent belief in judicial supremacy Their theories he demonstrates undermine the democratic foundations of the Constitution and the power of the majority to resolve for itself important questions of justice Central to this enterprise is Sunderland s reconsideration of The Federalist as the first most reliable and most profound commentary on the Constitution The Federalist he states is crucial because it explains the underlying theory of the Constitution as a whole a theory that gives meaning to its particular provisions In addition Sunderland reexamines the Declaration of Independence and the work of Hobbes Locke and Montesquieu in order to better define the nature and limits of their influence on the Framers His reading of these works in conjunction with The Federalist shows just how far afield contemporary commentators have strayed Sunderland deliberately echoes and amplifies Madison s wisdom in Federalist No 10 that the object of the Constitution is to secure the public good and private rights and at the same time to preserve the spirit and form of popular government To attain that object he persuasively argues requires that the judiciary acknowledge and enforce the constitutional limitations upon its own powers In an era loudly proclaiming the return of popular government majority rule and the will of the people that argument is especially relevant and appealing *Supreme Court Policymaking and Constitutional Law* S. Sidney Ulmer, 1986
