Activist Business Ethics:

Activist Business Ethics Jacques Cory, 2012-10-05 Jacques Cory's second book *Activist Business Ethics* expands upon the theoretical concepts developed in his first book *Business Ethics The Ethical Revolution of Minority Shareholders* published by Kluwer Academic Publishers in March 2001. Activist business ethics is needed in order to remedy the wrongdoing committed to stakeholders and minority shareholders. This will be achieved by cooperation between ethical businessmen, activist academics, stakeholders, and minority shareholders. We should treat others as we would want others to treat us, not through interest but by conviction. Yet this principle is not the guideline of many companies in the modern business world despite the fact that most religions and philosophers have advocated it in the last 3 000 years. How can we convince or compel modern business to apply this principle? And is it essential to the success of economy? In order to answer these questions, this book examines the evolution of activist business ethics in business in democracies in Christianity, Judaism, Islam, Buddhism, in philosophy and psychology. The book examines international aspects, the personification of stakeholders, the predominance of values and ethics for CEOs, and the inefficient safeguards of the stakeholders' interests. The book presents new vehicles for the safeguard of those interests, such as the Internet Transparency Ethical Funds and Activist Associations, and future activist vehicles such as the Supervision Board and the Institute of Ethics. Today everybody is a stakeholder and a minority shareholder of a company directly or through our pension funds or as a client, a supplier, a member of a community, and a citizen. The principal premise of the book is therefore that ultimately the wrongdoers act against themselves. The book is woven with many references on ethics and business ethics from the professional and classic world literature, the Bible, and other religious texts, poetry, maxims, and folk tales, showing that ethical problems are similar throughout the ages and cultures, but some of the solutions given in this book are new and original. *Activist Business Ethics* is primarily intended for the academic market and is particularly appropriate for academics in business administration, ethics, and finance. It should also appeal strongly to the professional business finance market and to stakeholders and minority shareholders as well, who are aware of the wrongdoing committed to them and who want to remedy the situation by activist conduct.

Dynamics of Controlled Mechanical Systems Gerhard Schweitzer, M. Mansour, 1988-11-28 Many mechanical systems are actively controlled in order to improve their dynamic performance. Examples are elastic satellites, active vehicle suspension systems, robots, magnetic bearings, automatic machine tools. Problems that are typical for mechanical systems arise in the following areas: Modeling the mechanical system in such a way that the model is suitable for control design; Designing multivariable controls to be robust with respect to parameter variations and uncertainties in system order of elastic structures; Fast real time signal processing; Generating high dynamic control forces and providing the necessary control power; Reliability and safety concepts taking into account the growing role of software within the system. The objective of the Symposium has been to present methods that contribute to the solutions of such problems. Typical examples are demonstrating the state of the art

It intends to evaluate the limits of performance that can be achieved by controlling the dynamics and it should point to gaps in present research and areas for future research. Mainly it has brought together leading experts from quite different areas presenting their points of view. The International Union of Theoretical and Applied Mechanics (IUTAM) has initiated and sponsored in cooperation with the International Federation of Automatic Control (IFAC) this Symposium on Dynamics of Controlled Mechanical Systems held at the Swiss Federal Institute of Technology (ETH) in Zurich, Switzerland, May 30–June 3, 1988.

Moralizing the Corporation Boris Holzer, 2010-01-01. Each chapter in this book by itself is a worthy contribution to the existing research on the TNC in a globalised world. In *Spire* Journal of Law, Politics and Societies, the argument of this book is so powerful and convincing because it focuses on global subpolitics, the corporate responsibility, the power of its critics and the consuming citizen. This shift of perspectives and its sophistication makes *Moralizing the Corporation* a must read for anyone interested in the dynamics of globalization. Ulrich Beck, University of Munich, Germany. *Moralizing the Corporation* offers a multi-disciplinary analysis of the conflicts between transnational corporations and transnational advocacy groups. The book is theoretically sophisticated and full of interesting and nuanced empirical findings that generate new knowledge about the relationship between politics and markets. It views transnational corporations as quasi-public institutions and explains their vulnerability to the non-state authority of political consumers and protest groups. Holzer develops theory on transnational subpolitics and corporate reflexivity and should be read by scholars and activists alike. Michele Micheletti, University of Stockholm, Sweden. This insightful book examines how transnational corporations respond to the challenges of anti-corporate activism and political consumerism. In prominent cases involving major corporations such as Nestlé, Nike and Royal Dutch Shell, transnational activists have successfully mobilized public opinion and consumers against alleged corporate misdemeanours. Campaigns and boycott calls can harm a corporation's image but as this book points out, public scrutiny also gives corporations the opportunity to present themselves as responsible and accountable corporate citizens who subscribe to the very norms and values propagated by the activists. Academics, scholars and postgraduate students in international business management, organization studies, social movement studies and political sociology will find this book invaluable.
