Activity Based Tutorials:

Activity-Based Tutorials Michael C. Wittmann, Richard N. Steinberg, Edward F. Redish, 2004-04-08 The Activity Based Tutorials are designed to accompany and enhance lecture instruction. They have been developed using a cycle of physics education research including investigations into student learning on a given topic, development of materials, and revision of the materials based on evaluation after use in the classroom. Activity Based Tutorials Volume 1: Introductory Physics presents tutorials for topics in kinematics, dynamics, oscillations, waves, heat and temperature, electrostatics, and circuits.

Activity-Based Tutorials Volume 1 Michael C. Wittmann, 2005-08-26 **Activity Based Physics Tutorials, Volume 2** Michael C. Wittmann, Richard N. Steinberg, Edward F. Redish, 2005-02-11 Built on the foundations of Halliday, Resnick, and Walker's Fundamentals of Physics, Sixth Edition, this text is designed to work with interactive learning strategies that are increasingly being used in physics instruction, for example, microcomputer-based labs, interactive lectures, etc. In doing so, it incorporates new approaches based upon Physics Education Research. PER aligns with courses that use computer-based laboratory tools and promotes Activity Based Physics in lectures, labs, and recitations. The Physics Suite: Workshop Physics Activity Guide, Module 4 Priscilla W. Laws, 2004-06-07 The Workshop Physics Activity Guide is a set of student workbooks designed to serve as the foundation for a two-semester calculus-based introductory physics course. It consists of 28 units that interweave text materials with activities that include prediction, qualitative observation, explanation, equation derivation, mathematical modeling, quantitative experiments, and problem solving. Students use a powerful set of computer tools to record, display, and analyze data, as well as to develop mathematical models of physical phenomena. The design of many of the activities is based on the outcomes of physics education research. The Workshop Physics Activity Guide is supported by an Instructor's Website that 1) describes the history and philosophy of the Workshop Physics Project, 2) provides advice on how to integrate the Guide into a variety of educational settings, 3) provides information on computer tools, hardware, and software, and apparatus, and 4) includes suggested homework assignments for each unit. Log on to the Workshop Physics Project website at <https://www.dickinson.edu/homepage/WorkshopPhysics>. Workshop Physics is a component of the Physics Suite, a collection of materials created by a group of educational reformers known as the Activity Based Physics Group. The Physics Suite contains a broad array of curricular materials that are based on physics education research, including Understanding Physics by Cummings, Laws, Redish, and Cooney, an introductory textbook based on the best-selling text by Halliday, Resnick, and Walker; RealTime Physics Laboratory Modules; Physics by Inquiry, intended for use in a workshop setting; Interactive Lecture Demonstration Tutorials in Introductory Physics; Activity Based Tutorials, designed primarily for use in recitations. **Tutorial Ideas for Educators on The Run** Michele Jarldorn, Cate Hudson, 2025-05-16 This professional book offers practical materials that provide fellow academics with tools to structure and scaffold learning experiences that reflect the practice context in which social work and human services are offered.
