Acts In Action Volume I:

Divine Agency and Divine Action, Volume I William J. Abraham, 2017-10-20 Divine Agency and Divine Action Volume I lays the groundwork for a constructive contribution to the contemporary debate regarding divine action. Noted scholar William J. Abraham argues that the concept of divine action is not a closed concept like knowledge but an open concept with a variety of context-dependent meanings. The volume charts the history of debate about divine action among key Anglophone philosophers of religion and observes that they were largely committed to this erroneous understanding of divine action as a closed concept. After developing an argument that divine action should be understood as an open fluid concept, Abraham engages the work of William Alston, Process metaphysics, quantum physics, analytic Thomist philosophy of religion, and the theology of Kathryn Tanner. Abraham argues that divine action as an open concept must be shaped by distinctly theological considerations and thus all future work on divine action among philosophers of religion must change to accord with this vision. Only deep engagement with the Christian theological tradition will remedy the problems ailing contemporary discourse on divine action.

Divine Agency and Divine Action, Volume III William J. Abraham, 2018 Volume 4. In the final of four volumes, the author seeks an account of God as agent. Systematic theology raises deep metaphysical questions about the central concepts we use in our thinking about God. Abraham illumines the concept of God as agent by attending to various traditional problems in Christian doctrine like the relation of freedom and grace, divine action in liberation theology, the presence of God in the Eucharist, divine providence, the relationship of Christianity and Islam, the relation of the natural science to theology and apparent design, and the realm of the demonic. Divine action is the point of departure for reflection on these topics.
