Actualizations James M. Martin, 1977 **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1979 **Secular Beats Spiritual** Steve Bruce, 2017-10-27 The decline of the Christian churches in the West is undeniable but commentators differ in their understanding of what this represents For some it shows a decline in interest in religion as such for others religion has not declined it has only changed its shape Possible candidates for Christianity's replacement are the new religious movements of the late 1960s and what is variously called New Age alternative or contemporary spirituality *Secular Beats Spiritual* offers a detailed study of the religious and spiritual innovations of the last 50 years It assesses their popularity in the UK and concludes that the not decline just change view cannot be sustained Serious interest in spirituality has grown far less quickly than has the number of us who have no religious or spiritual interest The most popular and enduring movements have been the least religious ones and those that have survived have done so by becoming more this worldly and less patently religious or spiritual Yoga is popular but as a secular exercise programme Transcendental Meditation now markets its meditational technique as a purely secular therapy British Buddhists now offer the secular Mindfulness and the Findhorn Foundation Europe's oldest New Age centre is no longer the germ of a counter cultural communalism but sells its expertise to major corporations Steve Bruce also demonstrates that although eastern religious themes such as reincarnation and karma have become more popular as the power of the Christian churches to stigmatise them has declined such themes have also been significantly altered so that what superficially looks like the easternization of the West might better be described as the westernization of the easternization of the West **The Facts on the Mind Sciences** John Ankerberg, John Weldon, 2011-04-29 Millions of people believe in the higher power of the mind but few know the potential risks of involvement in the Mind Sciences Unity Religious Science New Thought Christian Science est Silva Mind Control to name a few These questions are skillfully answered Does the mind really have power in itself How influential are the Mind Sciences Who is promoting the Mind Sciences Are the Mind Sciences compatible with Christianity This book offers practical discussion of this influential movement **The Elementary Forms of the New Religious Life** Roy Wallis, 2019-03-19 This book first published in 1984 examines the whole range of new religious movements which appeared in the 1960s and 1970s in the West It develops a wide ranging theory of these new religions which explains many of their major characteristics Some of the movements are well known such as Scientology Krishna Consciousness and the Unification Church Others such as the Process Meher Baba and 3 HO are much less known While some became international others remained local in other ways too such as style belief organisation they exhibit enormous diversity The movements studied here are classified under three ideal types world rejecting world affirming and world accommodating and from here the author develops a theory of the origins recruitment base characteristics and development patterns which they display The book offers a critical exploration of the theories of the new religions and analyses the highly contentious issue of whether

they reflect the process of secularisation or whether they are a countervailing trend marking the resurgence of religion in the West
