Pain Procedures in Clinical Practice Ted A. Lennard,2000 This new 2nd Edition provides revised and updated information on the

latest pain procedures being performed in today's practices. The authors present a simple how to approach for the various procedures discussed ranging from soft tissue injections and casting to the newer peripheral nerve and spinal blocks used in pain management. This edition is much larger and more comprehensive than the 1st edition. The revised title is more indicative of the book's contents and appeals to a wider range of medical specialties dealing with pain management. Many chapters have been expanded and either include additional or new authors. New chapters contain more in-depth discussions of drugs, radiation safety, complications, medicolegal issues, botulinum toxin injections, and radiofrequency procedures. The section on myofascial pain and trigger point injection provides greater detail on injection procedures. New radiographic photos are featured in the expanded spine injection section. Gross specimen comparisons are now included in the section on peripheral nerve injection. 300 illustrations highlight the various techniques presented. Includes 8 new chapters (see above). Written by highly noted experts in pain procedures and injections. Complementary Therapies in Dental Practice Peter Varley (DDFHom.), 1998. Complementary Therapies in Dental Practice looks at the various types of complementary therapies that can be used in dentistry, outlining the ways in which these therapies can be used in everyday dental practice or if more appropriate in which direction a dental practitioner can refer a patient. As time goes on, more and more dental practitioners are referring patients to specialists in alternative therapies. The aim of this book is to make more people aware that alternative therapies have a place in the practice of dentistry. **Books in Print**, 1994. **Primary Care Pediatrics** Carol Green-Hernandez, Joanne K. Singleton, Daniel Z. Aronson, 2001. This pediatric primary care text takes a family-centered approach, examining issues from the perspective of the child and the caregiver.
