Adapting Natos Deterrent Posture:

Adapting NATO's Deterrence Posture David Scott Yost, United States. Defense Threat Reduction Agency. Advanced Systems and Concepts Office, 2011 On 4 6 May 2011 the Estonian Ministry of Defense hosted and co sponsored a workshop in Tallinn concerning the challenges of adapting NATO's deterrence posture in light of the new Strategic Concept approved at the November 2010 Lisbon Summit The workshop focused on issues likely to figure in the NATO Deterrence and Defense Posture Review DDPR commissioned at the Lisbon Summit Abstract [Adapting NATO's Deterrence Posture](#) David Scott Yost, 2011

The Oxford Handbook of NATO James Sperling, Mark Webber, 2025-01-21 The North Atlantic Treaty Organization NATO has since its foundation in 1949 been the principal body of the Western security order and remains as important in the 2020s as it was in the 1950s This Handbook offers the most extensive treatment of the Alliance published in the last two decades providing detailed coverage of NATO allies policies and organizational structures It brings together internationally renowned scholars who interrogate NATO's actions from historical theoretical and empirical perspectives The Handbook is divided into nine parts Following an introductory part offering a thematic overview of NATO framed by different approaches to domestic politics and global order the second part explores three broad questions what is NATO for who is NATO for and whither NATO Part Three is more expressly theoretical providing multi-perspectival analyses of the Alliance Part Four then turns to how NATO works as a political military alliance Parts Five and Six are concerned with what NATO does in practical terms how it addresses a wide range of security threats and what operations it has mounted in response Part Seven looks at some of NATO's most significant allies including France Germany Italy Poland Turkey the United Kingdom and the United States Part Eight meanwhile is concerned with partnerships and key relationships beyond NATO's membership looking at Australia Georgia Ukraine Russia China the European Union and the European neutrals as well as ties to states in the Gulf the Middle East and North Africa The final part of the volume offers reflections on NATO's recent past and possible lines of future development

[Tactical Nuclear Weapons and Euro-Atlantic Security](#) Paolo Foradori, 2013-07-18 This book offers a comprehensive examination of the important security issue of tactical nuclear weapons in Europe Nuclear nonproliferation and disarmament have returned to the top of the international political agenda The issue assumes particular importance in regard to NATO given that some 150 200 US tactical nuclear weapons TNWs are still present in five countries belonging to the Alliance Belgium Germany Italy the Netherlands and Turkey The past few years have seen animated debate in the United States and Europe on the role of such weapons in the current scenario of international security and whether they can be further reduced or completely removed from Europe Bringing together leading scholars and analysts of TNW with country-specific competences this volume improves our understanding of this debate by providing in-depth analysis of the presence role perceived value and destiny of TNWs in Europe The book addresses the issue in a systematic manner taking into account the perspectives of all main actors directly or indirectly involved in the debate This approach provides

new and important insights that can inform both theoretical and policy work on a very critical and timely international issue especially during the ongoing review of NATO's deterrence and defence posture This book will be of much interest to students of European politics European security nuclear proliferation and IR in general [Adapting NATO's Deterrent Posture](#) Richard Lugar, Robert Edwards Hunter, 1985 En undersøgelse af i hvilket omfang NATO kan leve op til sin afskrækkelsesrolle herunder om der skal bruges nukleare våben

Future War and the Defence of Europe John R. Allen, Frederick Ben Hodges, Julian Lindley-French, 2021 This book offers a major new analysis of how peace and security can be maintained in Europe and provides a radical vision of a technology enabling future European defence It weaves history strategy policy and technology into a compelling analytical narrative and lays out the scale of the challenge Europeans and their allies face

The Future of NATO Andrew A. Michta, Paal Sigurd Hilde, 2014-06-23 Informed discussion of the current challenges facing NATO

Tactical Nuclear Weapons and NATO, 2012 NATO has been a nuclear alliance since its inception Nuclear weapons have served the dual purpose of being part of NATO military planning as well as being central to the Alliance's deterrence strategy For over 4 decades NATO allies sought to find conventional and nuclear forces doctrines and agreed strategies that linked the defense of Europe to that of the United States Still in light of the evolving security situation the Alliance must now consider the role and future of tactical or non strategic nuclear weapons NSNWs Two clear conclusions emerge from this analysis First in the more than 2 decades since the end of the Cold War the problem itself that is the question of what to do with weapons designed in a previous century for the possibility of a World War III against a military alliance that no longer exists is understudied both inside and outside of government Tactical weapons although less awesome than their strategic siblings carry significant security and political risks and they have not received the attention that is commensurate to their importance Second it is clear that whatever the future of these arms the status quo is unacceptable It is past the time for NATO to make more resolute decisions find a coherent strategy and formulate more definite plans about its nuclear status Consequently decisions about the role of nuclear weapons within the Alliance and the associated supporting analysis are fundamental to the future identity of NATO At the Lisbon Summit in Portugal in November 2010 the Alliance agreed to conduct the Deterrence and Defense Posture Review DDDR This effort is designed to answer these difficult questions prior to the upcoming NATO Summit in May 2012 The United States and its closest allies must define future threats and in doing so clarify NATO's identity purpose and corresponding force requirements So far NATO remains a nuclear alliance but it is increasingly hard to define what that means Publisher's website [Tactical Nuclear Weapons and NATO](#) Thomas M. Nichols, Douglas T. Stuart, Jeffrey D. McCausland, Army War College (U.S.). Strategic Studies Institute, 2012 is understudied both inside and outside of government Tactical weapons although less awesome than their strategic siblings carry significant security and political risks and they have not received the attention that is commensurate to their importance Second it is clear that whatever the future of these arms the status quo is unacceptable It is past the time

for NATO to make more resolute decisions find a coherent strategy and formulate more definite plans about its nuclear status. Consequently decisions about the role of nuclear weapons within the Alliance and the associated supporting analysis are fundamental to the future identity of NATO. At the Lisbon Summit in Portugal in November 2010 the Alliance agreed to conduct the Deterrence and Defense Posture Review (DDPR). This effort is designed to answer these difficult questions prior to the upcoming NATO Summit in May 2012.

Multinational Rapid Response Mechanisms John Karlsrud, Yf Reykers, 2018-12-19. The track record of military rapid response mechanisms troops on standby ready to be deployed to a crisis within a short time frame by intergovernmental organizations remains disappointing. Yet many of the obstacles to multinational actors launching a rapid and effective military response in times of crisis are largely similar. This book is the first comprehensive and comparative contribution to explore and identify the key factors that hamper and enable the development and deployment of multinational rapid response mechanisms. Examining lessons from deployments by the AU, the EU, NATO, and the UN in the Central African Republic, Mali, Somalia, and counter piracy in the Horn of Africa, the contributors focus upon the following questions: Was there a rapid response to the crises? By whom? If not, what were the major obstacles to rapid response? Did inter-organizational competition hinder responsiveness? Or did cooperation facilitate responsiveness? Bringing together leading scholars working in this area offers a unique opportunity to analyze and develop lessons for policy makers and for theorists of inter-organizational relations. This work will be of interest to scholars and students of peacebuilding, peacekeeping, legitimacy, and international relations.

NATO's Balancing Act David Scott Yost, 2014. NATO's Balancing Act evaluates the alliance's performance of its three core tasks: collective defense, crisis management, and cooperative security, and reviews its members' efforts to achieve the right balance among them. Yost considers NATO's role in the evolving global security environment and its implications for collective defense and crisis management in the Balkans, Afghanistan, Africa, Libya, and elsewhere.

Cold War Analytical Structures and the Post-Post-War World Cori E. Dauber, 1993-02-22. This volume takes a perspective on the debate over deterrence theory that has never been used before. Other books either address the differences between the two competing schools of thought: those who support Mutual Assured Destruction (MAD) and those who support nuclear warfighting, or examine particular policies from within the perspective of one or the other school of thought. Cori Dauber examines deterrence theory at a structural level which allows a focus on the similarities between the major perspectives on nuclear strategic doctrine. By examining such issues as validity standards and the evaluation of evidence, Dauber is able to assess deterrence as a theory of persuasion and to examine the way deterrence discourse shapes the thinking of policy makers and analysts that it still drives our analysis of alternatives even in the post-Soviet era. Dauber concludes that deterrence is a system designed to use weapons capabilities as a form of non-verbal communication with an Other. For the last forty years, the Soviet Other. Understanding these rhetorical structures and the way they function is essential in predicting the restrictions that deterrence places on the way the United

Resolved that the United States Should Reduce Significantly Its Military Commitments to NATO Member States ,1987 **Theater Nuclear Weapons and the NATO Strategy of Flexible Response** J. Michael Legge,1983 After more than a decade of comparatively little public interest in matters of nuclear strategy the last few years have seen a resurgence of concern about the policy of nuclear deterrence that the North Atlantic Alliance has followed since the early 1950s In Europe in particular this concern has centered on the role of theater nuclear weapons in NATO strategy This report briefly examines the way in which that strategy evolved from the foundation of the Alliance in 1949 to the formal adoption of the current flexible response strategy in 1967 with particular reference to the role of theater nuclear weapons It then traces the development within the NATO Nuclear Planning Group of the more detailed doctrine concerning the role of theater nuclear weapons within the overall strategy which led inter alia to the decision taken by NATO in 1979 to modernize the long term component of the theater nuclear forces The report examines the main arguments that have been advanced against the current flexible response strategy and considers the merits of various alternative strategies The report finally considers ways in which the Alliance s theater nuclear stockpile might be adapted to meet the political and strategic needs of the 1980s

The Revolutions of 1989 Wolfgang Mueller,Michael Gehler,Arnold Suppan,2015 Only a few people foresaw the sudden and momentous events of 1989 within months the seemingly unshakable communist regimes of Eastern Europe were washed away and with them the postwar international order This book gives an overview over the national revolutions and external reactions It contains chapters on the revolutions in all major countries of the former communist bloc as well as on the responses of all major international players The first part examines the revolutionary events from above and from below in Eastern Europe as well as China and their backgrounds The second part deals with Soviet and Western perceptions and responses The third part focuses on the aftermath of the revolutions on societal transformations the acceptance of the new Central European democracies to NATO and the EU and on the memory of 1989
