Acousto-Optic Devices:

Acousto-Optic Devices Jieping Xu, Robert Stroud, 1992-07-13 Develops the underlying theory of acousto optics from first principles formulating results suitable for subsequent calculations and design Special attention is given to design procedures for the entire range of acousto optic devices and a wide variety of applications for these devices is also described Further topics include bulk wave and thin film devices transducer theory isotropic and birefringent interaction Suitable for use as a textbook or practical design handbook includes generous problem sections illustrating important characteristics of TeO₂ LN and GaP

Design and Fabrication of Acousto-Optic Devices Goutzoulis, 1994-01-06 This work offers detailed discussions on all aspects of acousto optic deflectors modulators and tunable filters emphasizing hands on procedures for design fabrication and testing It contains previously unpublished treatments of acousto optic device design and impedance matching permitting the actual design of real devices and device matching circuits

Guided-Wave Acousto-Optics Chen S. Tsai, 2013-12-01 The field of integrated or guided wave optics has experienced significant and continuous growth since its inception in the late 1960s There has been a considerable increase in research and development activity in this field worldwide and some significant advances in the realization of working in tegrated optic devices and modules have been made in recent years In fact there have already been some commercial manufacturing and technical ap plications of such devices and modules The guided wave acoustooptics involving Bragg interactions between guided optical waves and surface acoustic waves is one of the areas of in tegrated optics that has reached some degree of scientific and technological maturity This topical volume is devoted to an in depth treatment of this emerging branch of science and technology Presented in this volume are concise treatments on bulk wave acoustooptics guided wave optics and surface acoustic waves and detailed studies of guided wave acoustooptic Bragg diffraction in three promising material substrates namely LiNbO₃ ZnO SiO₂ and GaAs the resulting wide band modulators and deflectors 2 and applications The chapters cover not only the basic principles and the oretical analysis but also the design fabrication and measurement of the resulting devices and modules and their applications
