

**Title**

**Philippine National Construction Corp. vs. Pabion**

**Case**

**G.R. No. 131715**

**Decision Date**

**Dec 7, 1999**

The Supreme Court affirms the jurisdiction of the Securities and Exchange Commission (SEC) over the Philippine National Construction Corporation (PNCC) and government-owned and controlled corporations (GOCCs), ruling that the SEC can compel PNCC to hold a stockholders' meeting and determine the corporate status of a corporation.

377 Phil. 1019

**THIRD DIVISION**

**[ G.R. No. 131715, December 08, 1999 ]**

**PHILIPPINE NATIONAL CONSTRUCTION CORPORATION, PETITIONER, VS. ERNESTO PABION AND LOUELLA RAMIRO, RESPONDENTS.**

**D E C I S I O N**

**PANGANIBAN, J.:**

The Securities and Exchange Commission (SEC) has jurisdiction over corporations organized pursuant to the Corporation Code, even if the majority or controlling shares are owned by the government. Hence, it can competently order the holding of a shareholders' meeting for the purpose of electing the corporate board of directors. While the SEC may not have authority over government corporations with original charters or those created by special law, it does have jurisdiction over "acquired asset corporations" as defined in AO 59. Specifically, the Philippine National Construction Company (PNCC) may be ordered by SEC to hold a shareholders' meeting to elect its board of directors in accordance with its Articles of Incorporation and By-Laws as well as with the Corporation Code. The chairman and the members of the PNCC Board of Directors hold office by virtue of their election by the shareholders, not by their appointment thereto by the President of the Republic.

Dennis,2011-04-12 Cell signaling which is also often referred to as signal transduction or in more specialized cases transmembrane signaling is the process by which cells communicate with their environment and respond temporally to external cues that they sense there All cells have the

capacity to achieve this to some degree albeit with a wide variation in purpose mechanism and response At the same time there is a remarkable degree of similarity over quite a range of species particularly in the eukaryotic kingdom and comparative physiology has been a useful tool in the development of this field The central importance of this general phenomenon sensing of external stimuli by cells has been appreciated for a long time but it has truly become a dominant part of cell and molecular biology research in the past three decades in part because a description of the dynamic responses of cells to external stimuli is in essence a description of the life process itself This approach lies at the core of the developing fields of proteomics and metabolomics and its importance to human and animal health is already plainly evident Provided by publisher Patents for Inventions, 1907 **Handbook of Cell Signaling** Ralph A.
