Action Research In Classrooms And Schools:

Action Research Craig A. Mertler, 2011-01-11 Written for pre and in service educators this Third Edition of Craig A. Mertler's *Action Research Improving Schools and Empowering Educators* introduces the process of conducting one's own classroom or school based action research in conjunction with everyday instructional practices and activities. The text provides educators with the knowledge and skills necessary to design research studies, conduct research, and communicate findings to relevant stakeholders and interested parties.

Creating Equitable Classrooms Through Action Research Cathy Caro-Bruce, 2007-08 Recognizing the importance of race, class, gender, culture, and ability, the authors provide a window into the difficulties that professional educators grapple with as they face the challenge of teaching all children. This text is both authentic and practical and it demystifies the issues of equity that pervade today's classrooms. Diane Yendol Hoppey, Associate Professor, University of Florida, Gainesville. Action research of this caliber on the subject of equity is critically needed for all children to have access to the same level of rigor and high standards. This is a must read for districts that really want to turn action research into action that affects student learning. Terry Morganti Fisher, Director of Professional Development, Austin Independent School District, TX. Utilize the power of action research to narrow the achievement gap. Despite the best intentions of reform efforts, educational inequity continues to exist in public schools. *Creating Equitable Classrooms Through Action Research* confronts this challenge head on and shows educators how they can use action research to both raise student achievement and strengthen instructional leadership. Ideal for both a first time action research endeavor or one already in progress, this practical guidebook helps practitioners formulate specific research questions, collect and analyze data, and communicate their findings. Educators will discover ten action research studies on narrowing the achievement gap. Guidelines for implementing an action research project that supports culturally relevant instruction. Authentic examples for discussion and reflection. Invaluable for school district leaders, teachers, professional development schools, and preservice teachers, this resource for systemwide improvement efforts helps schools provide more equitable learning environments for all children.

Action Research for Classrooms, Schools, and Communities Meghan Manfra, 2019-12-20 *Action Research for Classrooms, Schools, and Communities* is a core textbook for the action research course. This book addresses the trend toward high stakes testing and teacher accountability by focusing on understanding student outcomes. With edTPA rapidly becoming part of the requirements for teacher certification, teacher preparation programs will increasingly be looking to measure the impact of the teacher candidate on student learning. The book focuses on the potential for action research to lead to greater understanding about student outcomes from the perspective of

teachers school leaders and community members There is a special emphasis on helping pre service and experienced teachers use action research to understand their impact on student learning There is an emphasis on using action research to understand community impacts on schools unlike other books this text acknowledges the complex ecology linking classrooms schools and the community especially regarding issues fundamental to school reform *Teacher Action Research* Gerald J.
