

SOCIAL ACTION THEORY

Social Action Theory is a theory that attempts to examine people's actions and the underlying reasons for those actions. Below are four types of social actions proposed by sociologist Max Weber.

VALUE-RATIONAL ACTION

Action based on a commitment to a set of personal values or beliefs, e.g. the pursuit of social justice.

RATIONALLY PURPOSEFUL ACTION

Goal-oriented action that occurs as a result of rational decision-making, e.g. firing lazy employees to save money.

AFFECTIVE ACTION

Action based on emotions rather than rationality, e.g. crying at the death of an entirely fictional movie character.

TRADITIONAL ACTION

Action based on ritual, tradition, and cultural norms. e.g. putting up a Christmas tree on December 1st.

Action Theory:

Action Theory M. Brand, Douglas Walton, 1976-09-30 Proceedings of the Winnipeg Conference on Human Action held at Winnipeg Manitoba Canada 9 11 May 1975 [Collective Action Theory and Empirical Evidence](#) Ronald A. Francisco, 2010-03-10 This book comprises empirical tests of the theoretical implications of collective action theory specifically with regard to mobilization It is based on the author's European Protest and Coercion Data which won the Comparative Politics Section of American Political Science Association award for the best data set in 2007 The data is supplemented by historical investigations as well as other research The volume is divided into six chapters The introduction covers the theory of collective action in its many manifestations as well as the process of drawing out theoretical implications The second chapter goes to the core of the mobilization issues especially with regard to the role of leadership which is inextricably linked to mobilization The third chapter applies the concept of adaptation to the development of more productive tactics that promote mobilization in support of a public good and minimize the possibility of repression In chapter four five spatial hypotheses based on rationality and formal theories are developed and the role of time in protests is addressed The fifth chapter focuses on the fundamental problems of terror with evidence from the Basque region of Spain and France from Ireland against the Provisional Irish Republican Army The final chapter surveys the empirical evidence and summarizes the support of collective action theory Testing collective action theory implications with empirical evidence will appeal to political scientists sociologists economists and researchers concerned with mobilization

Situational Action Theory:

Oxford Bibliographies Online Research Guide Oxford University Press, 2010-05-01 This ebook is a selective guide designed to help scholars and students of criminology find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books chapters and journal articles to online archives electronic data sets and blogs Written by a leading international authority on the subject the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated related A reader will discover for instance the most reliable introductions and overviews to the topic and the most important publications on various areas of scholarly interest within this topic In criminology as in other disciplines researchers at all levels are drowning in potentially useful scholarly information and this guide has been created as a tool for cutting through that material to find the exact source you need This ebook is a static version of an article from Oxford Bibliographies Online Criminology a dynamic continuously updated online resource designed to provide authoritative guidance through scholarship and other materials relevant to the study and practice of criminology Oxford Bibliographies Online covers most subject disciplines within the social science and humanities for more information visit www.aboutobo.com [Practical Philosophy and Action Theory](#) Timo Airaksinen, 2023-04-14 Action theory and practical philosophy have their well grounded tradition both in Finland and in Poland This text is a collection of

PRACTICAL PHILOSOPHY AND ACTION THEORY Praxiology The International Annual of Practical Philosophy and Methodology Volume 2 This volume is divided into three parts the first one being so to speak a business card of Finland s contemporary practical philosophy the second one being a business card of the Poland s present praxiology and a collection of contributions from other philosophical environments related to the topics Alternative Action Theory Ota Weinberger,1998-09-30 Criticizes traditional deontic logic and argues in favor of a genuine logic of norms Gives a structure analysis of the so called practical inference and of nomic causal propositions and provides a critical account of von Wright s practical philosophy The work also offers critical analyses of discourse rationality and of Wittgensteien s views on philosophizing and includes an homage to von Wright Of interest to readers in philosophical logic practical philosophy sociology of institutions legal philosophy and theory democracy Annotation copyrighted by Book News Inc Portland OR

Action Theory and Social Science I. Pörn,2012-12-06 This book is intended as a contribution to the foundations of the sciences of man especially the social sciences It has been argued with increasing frequency in recent years that the vocabulary of social science is to a large extent an action vocabulary and that any attempt to systematize concepts and establish bases for understanding in the field cannot therefore succeed unless it is firmly built on action theory I think that these claims are sub stantially correct but at the same time it seems to me that action theory as it is relevant to social science still awaits vital contributions from logic and philosophy For example it has often been said rightly I believe that situa tions in which two or more agents interact constitute the subject matter of social science But have we got an action theory which is rich enough or com prehensive enough to allow us to characterize the interaction situation I think not Once we have such a theory however we should be able to give an accurate account of central social phenomena and to articulate our concep tions about the nature of social reality The conceptual scheme advanced in this book consists in the first instance of solutions to a number of characterization problems i e problems which may be expressed by questions of the form What is the nature of

Action Theory Helmut Staubmann,2006 The volume explores the legacy of the general theory of action in order to exploit it for contemporary debates on the methodology of the social sciences It includes the important but so far unpublished Parsons manuscript *The Sociology of Knowledge and the History of Ideas* and essays by Thomas Fararo University of Pittsburgh On the Foundations of Action Theory Victor Lidz Drexel University and Harold Bershadly University of Pennsylvania Parsons Tacit Metatheory Giuseppe Sciortino Universit degli studi di Trento Toward a Structural Theory of Social Pluralism David Sciulli Texas A Helmut Staubmann University of Innsbruck *The Affective Structure of the Social World* Helmut Staubmann is professor at the Institute for Sociology at the Leopold Franzens University Innsbruck Austria

Action Theory and Social Science I. Pörn,2011-10-13 This book is intended as a contribution to the foundations of the sciences of man especially the social sciences It has been argued with increasing frequency in recent years that the vocabulary of social science is to a large extent an action vocabulary and that any attempt to systematize concepts and

establish bases for understanding in the field cannot therefore succeed unless it is firmly built on action theory I think that these claims are substantially correct but at the same time it seems to me that action theory as it is relevant to social science still awaits vital contributions from logic and philosophy For example it has often been said rightly I believe that situations in which two or more agents interact constitute the subject matter of social science But have we got an action theory which is rich enough or comprehensive enough to allow us to characterize the interaction situation I think not Once we have such a theory however we should be able to give an accurate account of central social phenomena and to articulate our conceptions about the nature of social reality The conceptual scheme advanced in this book consists in the first instance of solutions to a number of characterization problems i e problems which may be expressed by questions of the form What is the nature of

Contemporary Action Theory Volume 1: Individual Action Ghita Holmström-Hintikka, R. Tuomela, 2013-04-17

Contemporary Action Theory Volume I Individual Action is concerned with topics in philosophical action theory such as reasons and causes of action intentions freedom of will and of action omissions and norms in legal and ethical contexts as well as activity passivity and competence from medical points of view Cognitive trying freedom of the will and agent causation are challenges in the discussion on computers in action The Volume consists of contributions by leading experts in the field written specifically for this volume No comparable volume currently exists **Action, Decision, and Intention** Robert Audi, 2012-12-06 Most of the papers in this collection are contributions to action theory intended to be of some relevance to one or another concern of decision theory particularly to its application to concrete human behavior Some of the papers touch only indirectly on problems of interest to decision theorists but taken together they should be of use to both decision theorists and philosophers of action Robert Audi's paper indicates how a number of questions in action theory might bear on problems in decision theory and it suggests how some action theoretic results may help in the construction or interpretation of theories of decision both normative and empirical Carl Ginet's essay lays foundations for the conception of action His volitional framework roots actions internally and conceives them as irreducibly connected with intentionality Hugh McCann's essay is also foundational but stresses intention more than volition and lays some of the groundwork for assessing the rationality of intention and intentional action In William Alston's paper the notion of a plan as underlying intentional action is central and we are given both a conception of the structure of intentional action and a set of implicit goals and beliefs whose content is represented in the plan which form an indispensable part of the basis on which the rationality of the action is to be judged **Studies from the Rockefeller Institute for Medical Research** Rockefeller Institute for Medical Research, 1915 *Conscious Action Theory* Wolfgang Baer, 2019-11-20 Conscious Action Theory provides a logical unification between the spirit and the material by identifying reality as an event that processes personal experiences into explanatory memories from which personal experiences are regenerated in a never ending cycle of activity Baer explores the idea that our personal feelings are undeniable facts that have been systematically excluded from the basic sciences thereby

leaving us with a schizophrenic division between objective materialism and spiritual idealism Cognitive Action Theory CAT achieves this unification by recognizing that the observer's existence is the foundational premise underlying all scientific inquiry It develops as an event oriented physical theory in which the first person observer is central By analyzing the methods through which we human observers gain knowledge and create the belief systems within which our experiences are explained we discover a fundamental truth all systems are observers and exhibit some form of internal awareness Events not the objects appearing in them are the fundamental building blocks of reality The book is comprised of three parts the first addresses the paradigm shift from an object to an event oriented world view the second develops the foundations of action physics for an event oriented world view and the third provides examples of how these new ideas can be applied to move our knowledge up the next evolutionary step of human development This book will benefit anyone questioning their role in the universe especially those in interdisciplinary fields of philosophy psychology neuroscience and medicine who seek understanding of quantum theory as the physics of conscious systems that know the world

Psychological Monographs, 1905 Includes music

Dynamics in Action Alicia Juarrero, 2002-01-25 What is the difference between a wink and a blink The answer is important not only to philosophers of mind for significant moral and legal consequences rest on the distinction between voluntary and involuntary behavior However action theory the branch of philosophy that has traditionally articulated the boundaries between action and non action and between voluntary and involuntary behavior has been unable to account for the difference Alicia Juarrero argues that a mistaken 350 year old model of cause and explanation one that takes all causes to be of the push pull efficient cause sort and all explanation to be prooflike underlies contemporary theories of action Juarrero then proposes a new framework for conceptualizing causes based on complex adaptive systems Thinking of causes as dynamical constraints makes bottom up and top down causal relations including those involving intentional causes suddenly tractable A different logic for explaining actions as historical narrative not inference follows if one adopts this novel approach to long standing questions of action and responsibility

A Theory of Social Action R. Tuomela, 2012-12-06 It is somewhat surprising to find out how little serious theorizing there is in philosophy and in social psychology as well as sociology on the nature of social actions or joint actions in the sense of actions performed together by several agents Actions performed by single agents have been extensively discussed both in philosophy and in psychology There is accordingly a booming field called action theory in philosophy but it has so far strongly concentrated on actions performed by single agents only We of course should not forget game theory a discipline that systematically studies the strategic interaction between several rational agents Yet this important theory besides being restricted to strongly rational acting fails to study properly several central problems related to the conceptual nature of social action Thus it does not adequately clarify and classify the various types of joint action except perhaps from the point of view of the agents utilities This book presents a systematic theory of social action Because of its reliance on so called purposive causation and generation it is called the

purposive causal theory This work also discusses several problems related to the topic of social action for instance that of how to create from this perspective the most central concepts needed by social psychology and sociology While quite a lot of ground is covered in the book many important questions have been left unanswered and many others unasked as well

Tadeusz Kotarbiński's Action Theory Piotr Tomasz Makowski, 2016-11-30 The book introduces Tadeusz Kotarbiński's philosophy of action into the mainstream of contemporary action theoretical debates Piotr Makowski shows that Kotarbiński Alfred Tarski's teacher and one of the most important philosophers of the renowned Lvov Warsaw school proposed a groundbreaking original and in at least a few respects still fresh perspective in action theorizing The book examines and develops Kotarbiński's ideas in the context of the most recent discussions in the philosophy of action The main idea behind Kotarbiński's action theory and thus behind this book is the significance of the philosophical investigations of the general conditions of effectiveness efficiency and economy of intentional actions Makowski presents and reinterprets Kotarbiński's views on these dimensions of our activities and sheds new light on the most important areas of action theory
