*Ada, an Advanced Introduction* Narain Gehani, 1984     *Ada* Henry F. Ledgard, 1980     *ADA®* Henry Ledgard, 2012-12-06 If Charles Babbage is to be regarded as the father of modern day computer technology then surely the Countess Augusta Ada Lovelace after whom this new language is named must be remembered as its midwife It was she the daughter of England's poet Lord Byron who translated the work of the Italian mathematician L F Menabrea attaching her own scientific commentaries on the dissimilarities between the difference engine and the analytical engine It was Lady Lovelace the great lady of computers who delivered the notes and loosely organized writings of Babbage with her own invaluable amendments to a world not quite ready to receive them The Ada language effort has employed hundreds if not thousands of minds and a healthy sum of money since its conception Ada was fostered by the High Order Language Working Group HOLWG chartered by the U S Department of Defense in January of 1975 with the overall objective of developing a systematic approach to improved use of software by the military One would think the Pentagon an unlikely foster parent for a new computer language Regardless of its lineage the question that begs asking is of course Why The answer is by no means a simple one but some brief background may help to clarify the matter At present the Department of Defense is the largest software consumer on earth employing roughly 400 different computer languages and dialects The situation some have commented is at best untidy
