## **Ada For Specification Possibilities And Limitations:**

Ada for Specification Stephen J. Goldsack, 1985 This book examines the use of the Ada programming language in the specification stage of a software development project placing emphasis throughout on the issues involved in specification and on the generation of ideas for software tools for use in an Ada environment It begins with a discussion of the role and purpose of specification in a large scale software project describing the features that a specification language should have and assessing Ada as a candidate The use of Ada as a program design language and in system modelling is then examined together with a number of other specification languages Conversion of a specification into a program and tools for handling specifications are then considered before the findings are summarised and conclusions drawn An appendix describes an Ada related specification language adapted to general engineering systems The book is based on a study for the Commission of the European Communities completed in July 1984 *AGARD Advisory Report* North Atlantic Treaty Organization.
