Ada Towards Maturity:

The Safety of Systems Felix Redmill, Tom Anderson, 2008-03-05 Since 1993 the Safety Critical Systems Club has hosted the Safety critical Systems Symposium SSS each February Every year the programme has reflected what is then of particular interest to the safety community in ways of working in analysis techniques in technology in standards and in research work that is on the point of being useful to practitioners This book presents the papers delivered at the landmark fifteenth SSS A subject that is mostly neglected by safety practitioners but which if studied more carefully could lead to both technical and economic efficiencies as well as more effective protection is the relationship between safety and security The management of both is based on risk analysis and there are indications that the analyses could effectively be combined The Symposium has offered papers on this subject in the past and this year there are three Continuing the trend of recent years there are five papers on the development of safety cases which are intended to demonstrate or claim the achievement of safety in defined applications and under given circumstances Some of the papers report on experiences in the field but others venture to propose new ways in which safety cases may be used or extended Clinical Management of Herpes Viruses Stephen L. Sacks, 1995 Much has been said about managing herpesvirus infections since the discovery of acyclovir more than 15 years ago This book aims to bring practical advice to the key clinician who is faced with managing these infections It addresses questions like there are antiviral treatments for many of these infections but who should be getting these drugs and who should not What are the advantages if any of the new drugs over the old ones Which patients should be targeted for intervention What is the clinical reality of antiviral resistance Where do the up and coming vaccines fit into the picture When should therapy be discontinued or reassessed How are patients presenting other than chorioretinitis in AIDS or pneumonitis in transplantation The contributing clinician scientists deal with these questions and many more Listed by Biological Abstracts RRM BIOSIS volume 48 issue 8 August 1995 Covered by Current Contents Life Sciences ISI volume 39 no 2 January 1996 p 12 **TAPSOFT'97: Theory and Practice of Software Development** Michel Bidoit, Max Dauchet, 1997-04-02 This book constitutes the refereed proceedings of the 7th International Joint Conference CAAP FASE on Theory and Practice of Software Development TAPSOFT 97 held in Lille France in April 1997 The volume is organized in three parts The first presents invited contributions the second is devoted to trees in algebra in programming CAAP and the third to formal approaches in software engineering FASE The 30 revised full papers presented in the CAAP section were selected from 77 submissions the 23 revised full papers presented in the FASE section were selected from 79 submissions Computing Tomorrow Ian Wand, Robin Milner, 1996-07-13 First published in 1996 this collection of essays by distinguished computer scientists celebrates the achievements of research and speculates about the unsolved problems in computer science that require future investigation Since the subject stretches from technology in the field through engineering design to foundations in mathematics there is a wide variety of concerns and approaches among the authors The book s purpose is to

show that long term research in computer science is crucial and that it must not be driven solely by commercial considerations The authors do not shirk the difficult aspects of their topics but try to expose them in the simplest terms possible without diluting them in order that the reader can understand the issues involved Thus the book also represents a broad overview of much of the state of knowledge and future expectations of computer science illustrating that it is much more than a technology and it is a fully fledged and growing intellectual discipline with its own engineering principles and its own scientific concepts and models It will be stimulating reading because it represents the views of prominent authorities who have had a significant impact on the direction of innovation research and development in computer science

The Judas kiss Gerry Smyth,2015-05-01 This book argues that modern Irish history encompasses a deep seated fear of betrayal and that this fear has been especially prevalent since the revolutionary period at the outset of the twentieth century The author goes on to argue that the novel is the literary form most apt for the exploration of betrayal in its social political and psychological dimensions The significance of this thesis comes into focus in terms of a number of recent developments most notably the economic downturn and the political and civic betrayals implicated therein and revelations of the Catholic Church's failure in its pastoral mission As many observers note such developments have brought the language of betrayal to the forefront of contemporary Irish life This book offers a powerful analysis of modern Irish history as regarded from the perspective of some of its most incisive minds including James Joyce Liam O Flaherty Elizabeth Bowen Francis Stuart Eugene McCabe and Anne Enright
