Plant Lipids Denis J. Murphy,2020-02-03 New research tools have revealed many surprising aspects of the dynamic nature of lipids and their participation in processes such as recognition intra and inter cellular signalling deterrence and defense against pathogens membrane trafficking and protein function This is in addition to new information on the more established roles of plant lipids as structural components of membranes and as long term storage products Plant lipids are also increasingly being seen as sources of a new generation of environmentally friendly biodegradable and renewable industrial products including biopolymers and high grade lubricants *Plant Lipids Biology Utilisation and Manipulation* provides a broad overview of plant lipid research and its many applications Linking various disciplines the editor brings together researchers from major international laboratories to review the history and current state of progress in this quickly evolving field The text starts by providing a fascinating historical perspective on the study of plant lipids from its inception as a branch of alchemy in the seventeenth century to the current post genomic era It then offers a detailed discussion on the formation modification and utilization of fatty acids This is followed by an exploration of the major classes of macromolecular structures formed by plant lipids including bilayer membranes and storage bodies From there the contributors consider other types of macromolecular lipid assemblies in plants examining proteins and the key plant lipid structure the cuticle The final chapters look at diverse classes of plant lipids that are linked to various aspects of signaling This text provides an excellent resource for researchers and professionals in plant biochemistry molecular biology biotechnology and genetics in both the academic and industrial sectors It also meets the needs of students looking for a comprehensive introduction to this field as well as direction for fut

Biacs,2012-12-06 Proceedings of the 8th International Symposium on title held in Budapest Hungary July 1988 Covers traditional areas of research in the field metabolism structure and function of lipids Special attention is given to biocides and their interaction with plant lipids and the metabolic responses *The Biochemistry of Plants: Lipids* ,1980

Proceedings of ASPL2019 - 8th Asian-Oceanian Symposium on Plant Lipids Xue-Rong Zhou,Ikuo Nishida,Mi Chung Suh,Thomas Vanhercke,2021-02-03 *Plant Lipid Biochemistry, Structure and Utilization* Peter J. Quinn,John L. Harwood,1990 The 9th International Symposium on Plant Lipid Biochemistry was held at Wye College Kent in July 1990 Not only has the scale and scope of the topic expanded since the first biannual meeting in 1974 but there have been giant strides particularly in the last few years in our knowledge of the detailed structure and function of plant lipids Industry has never been slow to recognize the commercial importance of plant lipids and has invested heavily in the new technologies described in this book Virtually all the laboratories that have contributed to these developments were represented at the meeting and

this volume is a compendium of their individual contributions *Physiological Processes in Plants Under Low Temperature Stress* A. Bhattacharya, 2022-02-25 This book is a collection of comprehensive reviewed chapters covering major physiological aspects both production as well as biochemical aspects of a plant under low temperature stress Low temperature stress has been dealt in two parts first between 10 to 00 C and secondly between 0 to 400 C This book highlights the physiological aspects of plants under low temperature stress and explains the various adaptive measures plants undergo to tolerate low temperature stress Essential information is provided on germination growth and development dry matter accumulation partitioning and final yield of a crop plant As physiology deals with morphological and biochemical aspect of all the basic processes therefore an in depth understanding the major physiological issues in plants under high temperature will help plant breeders to tailor different crop plants with desirable physiological traits to do better under higher temperature The present book is intended to cover the effects of low temperature stress on the various physiological aspects in plants Not only in production physiology this book also deals with major biochemical processes like photosynthesis nitrogen and lipid metabolism mineral nutrition and plant growth hormones Efforts have been made deal with different measures to mitigate the effects of low temperature stress on plants This book will be an asset for post graduate students faculty members researchers engaged in not only in physiological studies but also agronomy plant breeding and like subjects In depth analysis of the major physiological processes in plants under low temperature stress that are presented in this book will help plant breeders for tailoring crops for desirable physiological traits needed to survive and to give better economic return under the threats of low temperature stress This book is also helpful for policy planners and industries engaged in agribusiness in short term as well as long term gain
