DeVita (Jr.), Samuel Hellman, Steven A. Rosenberg, 1991 *Principles and Practice of the Biologic Therapy of Cancer* Steven A. Rosenberg, 2000 **Cancer Management in Man: Chemotherapy, Biological Therapy, Hyperthermia and Supporting Measures** Boris Minev, 2011-01-13 This book represents a comprehensive description and evaluation of the most up to date approaches to cancer management Each chapter prepared by leading basic researchers and clinicians provides an in depth description of a specific method for cancer management The chemotherapy section of the book is updated to include the newest drugs as well as those currently in development Organized by drug class this section provides the latest information on most drugs including their mechanisms of action interactions with other agents toxicities side effects and mechanisms of resistance The biological therapy section of the book provides expanded coverage of the currently used cytokines vaccines and cell based therapies of cancer Full consideration is also given to other modern treatment approaches such as tyrosine kinase inhibitors inhibitors of tumor angiogenesis and the transcatheter management of cancer Current advances in hyperthermia in cancer treatment hematologic and nutritional support bone marrow transplantation pain management and care of the terminally ill patients with cancer are also presented In summary this book provides a comprehensive coverage of the current knowledge on the most innovative systematic and multidisciplinary approaches to the treatment of patients with cancer **Biological and Hormonal Therapies of Cancer** Kenneth A. Foon, Hyman B. Muss, This volume *Biological and Hormonal Therapies of Cancer* which is part of the series *Cancer Treatment and Research* presents selected new information concerning biologic and hormonal therapy of cancer We have attempted to provide the reader with topics of major interest in a timely fashion There is renewed interest in biologic therapy of cancer Two chapters review the role of interferon in the hematologic malignancies and in solid tumors Vaccine therapies have come to the forefront of cancer therapy recently and two chapters approach different strategies of vaccine therapies one reviews the cellular vaccine therapies and another the anti idotype approach The hormonal therapy chapters focus on current uses of endocrine therapy in endometrial breast and prostate cancer In addition hormonal strategies for the prevention of breast cancer and endometrial cancer including exciting information relating to phytochemicals are presented The effects of tamoxifen on endometrium is a topic of major interest and is discussed in detail Finally there is a chapter on estrogen receptor expression and regulation in human breast cancer These chapters are all written by experts in the field and contain timely and relevant information of interest to laboratory and clinical scientists and practitioners alike Biologic and endocrine therapies represent major areas of cancer research interest The advent of newer biologic therapies including new antibody targeted treatments and the use of biologics as tumor modulators to enhance the effects of other treatment regimens is an

exploding avenue of research **Principles of Cancer Biotherapy** R.K. Oldham,2012-12-06 At the time of the first edition of Principles of Cancer Biotherapy this book represented the first comprehensive textbook on biological therapy Whereas in 1991 when the second edition was published there was still some doubt on the part of many oncologists and cancer researchers as to the therapeutic value of these new approaches it is now generally agreed that biopharmaceuticals are producing major opportunities for new cancer therapies Cancer biotherapy has truly matured into the fourth modality of cancer treatment The third edition is now needed as a result of the tremendous progress that has been made in recent years using biologicals in cancer treatment The book summarizes an evolving science and a rapidly changing medical practice As we near the millennium it now becomes possible to envision a much more diversified system of cancer research and treatment that will afford greater opportunities for patients Some forms of cancer biotherapy use the strategy of tumour stabilization and control through continued biological therapy akin to the use of insulin in the treatment of diabetes This textbook illustrates new methods of thinking and new strategies for control of cancer It is always difficult to move from past dogma to future opportunity but this third edition of Principles of Cancer Biotherapy illustrates why it is so important to the patients for researchers and clinicians to explore and apply these new opportunities in cancer biotherapy **Biologic Therapy of Leukemia** Matt Kalaycio,2003-04-04 Exciting new biologic therapies for treating leukemia are appearing so rapidly that clinicians often find it difficult to make informed decisions about their use when making patient treatment decisions Biologic Therapy of Leukemia summarizes and reviews all the available data concerning these cutting edge biologic therapies so that practicing clinicians can make the correct patient care choices Here the busy physician will find in one convenient place crucial information on the uses and limitations of the major biologic therapies for leukemia the different biologic strategies for its treatment the management of patients being treated with such biologic agents and the current and future role of emerging biologic agents **Technical and Biological Components of Marrow Transplantation** C. Dean Buckner,Reginald Clift,1995-08-31 Technical and Biological Components of Marrow Transplantation presents up to date information on the scientific and technological advances that will extend and improve the clinical application of bone marrow transplantation The book includes the latest information on chronic myeloid leukemia and thalassemia advances in supportive care cytokines and progenitor expansion and cord stem cell technology Soon more of patients will receive marrow transplants as part of the therapy for solid tumors and metabolic disease than for the treatment of hematologic disease The contributors to this volume describe some of these applications hinting at yet further exciting possibilities [The impact of clinical and environmental toxicological exposures and eye health](#) Anat Galor,2024-06-26 The eye is often times referred to as the window to the soul This is relevant to the practice of medicine as many systemic disorders can present with eye manifestations that can be detected by routine ophthalmic examination and the findings used to help physicians in the diagnosis and management of an individual patient Conditions with potential eye manifestations include infections metabolic

disorders auto immune diseases and exposure to name a few With respect to the latter various toxicological exposures whether environmental or clinical can manifest with eye findings Some associations are well characterized such as crystalline retinal deposits that can occur with prolonged tamoxifen use while others are less well described or understood SEER Program, Self Instructional Manual For Cancer Registrars, Book 1, Objectives And Functions Of Cancer Registries, Etc., Revised May 1999 ,1999 Self Instructional Manual for Cancer Registrars ,1999 Short Textbook of Surgery Roy,2010-11 Concise step by step guide to surgeries in all areas of the body with numerous well illustrated photographs figures and line diagrams Journal of the National Cancer Institute ,2005 Summaries of papers contained in the journal accompany each issue 19 The Principles of physics and biology of radiation therapy Bernhard Kroenig,1922
