Lumsden,James L. Vaughn,1993 These proceedings begin with an introductory section that deals with the definition framework and role of biologically based control with emphasis on development of a holistic systems approach to lead the field into the 21st century The following five sections include papers on biocontrol agents for suppression of insects biocontrol agents for suppression of plant pathogens biocontrol agents for suppression of weeds natural compounds in pest management and genetic manipulation of biocontrol agents The last section deals with implementation of needs issues and challenges Annotation copyright by Book News Inc Portland OR

*Biologically Based Technologies for Pest Control* ,1995 The way the nation manages pests is changing because of efforts to reduce the reliance on conventional pesticides Driving this change is strong public opinion coupled with action by Congress and by federal and state agencies At the same time pest control needs are rising Many important pests are now resistant to formerly effective chemical controls And new pests continue to enter the country or spread to new locations where they threaten agriculture native ecosystems or human health The farmers foresters ranchers and others who seek to prevent excessive pest damage are increasingly aware of the shortcomings of conventional pest control approaches

**Biologically Based Technologies For Pest Control** Roger C Herdman,1998-01-01 Examines Biologically Based Tools Used In Integrated Pest Management Ipm Technologies Include Use Of Natural Predators And Parasites And Commercial Formulations Of Microbial Pesticides Contents SummaryContext And Scope Current Use And Future Pote Biological and Biotechnological Control of Insect Pests Jack E. Rechcigl,Nancy A. Rechcigl,1999-09-24 Pest and disease management continues to challenge the agricultural community The rise in new pest and crop problems juxtaposed with public concern over pesticide use and more stringent environmental regulations creates the need for today s agricultural producers to stay current with new technologies for producing quality crops profitably Biological and Biotechnological Control of Insect Pests presents an overview of alternative measures to traditional pest management practices utilizing biological control and biotechnology The removal of some highly effective broad spectrum chemicals caused by concerns over environmental health and public safety has resulted in the development of alternative reduced risk crop protection products These products less toxic to the environment and easily integrated into biological control systems target specific life stages or pest species Predation recognized as a suitable long term strategy effectively suppresses pests in biotechnological control systems Biological and Biotechnological Control of Insect Pests covers these topics and more It explores the current approaches in
