Biology And Social Behavior:

Evolutionary Biology and Human Social Behavior Napoleon A. Chagnon, William Irons, 1979 Biology and Social Behavior, 1974 **The Common Tern** Joanna Burger, Michael Gochfield, Michael Gochfeld, 1991 For more than twenty years the authors studied the complex breeding and social behavior of colonies of terns A significant dynamic of their social behavior is their mobbing behavior when they aggressively defend their nests against predators and will attack intruders including human beings Analysis of this and other behaviors as they affect breeding and population provide fascinating insights in the study of birds **Mathematical Biology of Social Behavior** Nicolas Rashevsky, 1959 Molecular and Cellular Basis of Social Behavior in Vertebrates Jacques Balthazart, 2012-12-06 Understanding the brain mechanisms which underlie behavior is one of the most challenging tasks of modern biology The study of these mechanisms can be approached using a variety of biological systems as models depending essentially on the type of question being asked and the technical approach which is considered In vertebrates the study of brain neurochemistry in relation to behavior e xpression has made tremendous progress during the last two decades In particular much attention has been devoted to the effect of steroid hormones on brain structure and activity in connection with social and mainly reproductive behavior This book exemplifies some of the major trends in the field I did not attempt to cover exhaustively all the work that has been done in this area but rather to present a series of selected reviews on the molecular and cellular brain mechanisms most directly related to social behavior This selection obviously reflects my own interests but also I believe highlights those areas of research in which important progress has been made in recent years A number of brain biochemical or cellular mechanisms which could be related to behavior but have not been formally demonstrated to be so are consequently ignored The focus here is on social behavior and thus steroid dependent processes are covered in priority This choice of course leads us to ignore major trends in brain and behavior research but this is I hope clearly reflected in the title of the volume *Hormones and Animal Social Behavior* Elizabeth Adkins-Regan, 2005-08-07 This book is a graduate level guide to the intersection between animal social behaviour and behavioural endocrinology The fascinating connections between steroids peptides and social behaviour are explored through an integrative and comparative approach combining various methods Biological Bases of Human Social Behaviour Robert A. Bottlenose Dolphins Amy Samuels, 1996 Research on cetacean social behavior is in transition from descriptive natural history to quantitative analyses To expedite this change an intellectual history of the field is provided from the early whaler naturalists to oceanarium observations whale carcass studies pseud scientific inquiries into human dolphin communication and longterm field studies Subsequent chapters illustrate use of systematic methodologies to better understand bottlenose dolphin social relations Samuels and Gifford adapted a quantitative technique from primate behavioral research to study agonism among captive dolphins Males were dominant to females females had stable age ordered dominance relations and two males had a changeable dominance relationship Sex differences in dominance relations generated predictions about the behavior of wild dolphins that can be tested using this technique Samuels Richards and Mann investigated the association of wild juvenile dolphins with their mothers after weaning Juvenile daughters continued to associate with their mothers whereas juvenile sons rarely did so even though they remained in the same area as their mothers Sex differences in juvenile association patterns appeared to foreshadow adult social networks Samuels and Spradlin applied quantitative behavioral techniques to evaluate dolphin behavior in Swim With Dolphins programs Two program types were defined by presence Controlled or absence Not Controlled of explicit trainer regulation of dolphin with human interactions In Not Controlled programs the behavior of dolphins and humans threatened human safety and dolphin well being whereas Controlled programs effectively minimized behaviors that posed risk to dolphins or humans
