The Biology of Ultimate Concern Theodosius Dobzhansky, 1969      **The Biology of Ultimate Concern** Theodosius Grigorievich Dobzhansky, 1969      *Scientifically Speaking* C.C. Gaither, Alma E Cavazos-Gaither, 2000-11-21 In these days of ever increasing specialization it is important to gain a broad appreciation of science Entertaining and informative Scientifically Speaking A Dictionary of Quotations Second Edition contains the words and wisdom of several hundred scientists writers philosophers poets and academics The largest compilation of published sci      *The Evolving God* J. David Pleins, 2013-06-06 In focusing on the story of Darwin s religious doubts scholars too often overlook Darwin s positive contribution to the study of religion J David Pleins traces Darwin s journey in five steps He begins with Darwin s global voyage where his encounter with religious and cultural diversity transformed his understanding of religion Surprisingly Darwin wrestles with serious theological questions even as he uncovers the evolutionary layers of religion from savage roots Next we follow Darwin as his doubts about traditional biblical religion take root affecting his career choice and marriage to Emma Wedgwood Pleins then examines Darwin s secret notebooks as he searches for a materialist theory of religion Again other surprises loom as Darwin s reading of Comte s three stages of religion s development actually predate his reading of Malthus Pleins explores how Darwin applied his discovery to the realm of ethics by formulating an evolutionary view of the Golden Rule in his Descent of Man Finally he considers Darwin s later reflections on the religion question as he wrestled with whether his views led to atheism agnosticism or a new kind of theism The Evolving God concludes by looking at some of the current religious debates surrounding Darwin and suggests the need for a deeper appreciation for Darwin as a religious thinker Though he grew skeptical of traditional Christian dogma Darwin made key discoveries concerning the role and function of religion as a natural evolutionary phenomenon      **Redefining Russian Literary Diaspora, 1920-2020** Maria Rubins, 2021-03-11 Over the century that has passed since the start of the massive post revolutionary exodus Russian literature has thrived in multiple locations around the globe What happens to cultural vocabularies politics of identity literary canon and language when writers transcend the metropolitan and national boundaries and begin to negotiate new experience gained in the process of migration Redefining Russian Literary Diaspora 1920 2020 sets a new agenda for the study of Russian diaspora writing countering its conventional reception as a subsidiary branch of national literature and reorienting the field from an excessive emphasis on the homeland and origins to an analysis of transnational circulations that shape extraterritorial cultural practices Integrating a variety of conceptual perspectives ranging from diaspora and postcolonial studies to the theories of translation and self translation World Literature and evolutionary literary criticism the contributors argue for a distinct nature of diasporic literary expression predicated on hybridity ambivalence and a sense of multiple belonging As the complementary case studies demonstrate diaspora narratives consistently recode historical memory contest the mainstream discourses of Russianness rewrite received cultural tropes and explore topics that have

remained marginal or taboo in the homeland These diverse discussions are framed by a focused examination of diaspora as a methodological perspective and its relevance for the modern human condition Models of Man J.J. Dagenais,2012-12-06 This essay is first a theoretical and historical study of some classical scientific ways of studying human being in the world The more readily accessible and more commonly discussed models of being human were chosen for review here but structuralism is included because I believe it will have the same impact in America as it has had in France and I hope that American readers might be forewarned about what may be ideologically at stake before the technical and fruitful aspects of the movement become an academic fad in the United States The subjects included are mainline experimental psychology from Wundt to Skinner with its relatively shortlived functionalist and Watsonian behaviorist formulations holistic psychology from Brentano through Stumpf Husserl and Goldstein to Maslow Rogers and contemporary third force psychology and the psychoanalytic model for which the only paradigm is Freud himself Preeminence is given to psychological paradigms since their subject matter lies closest to the classical philosophical tradition from which philosophical anthropology emerged This book is in the final analysis a prolegomenon to an articulated philosophical anthropology Sociological models are also considered the classical tradition from Comte to the present and Marxist anthropology from the manuscripts of 1844 to the present The structuralist model from Durkheim to Chomsky is also considered since it cuts across and gives new dimensions to all the foregoing models The essay is second a phenomenological critique of these historico theoretical considerations
