Synthesis of Biomass Utilization for Bioenergy Production in the Western United States David L. Nicholls, 2010-06
Examines the use of woody residues primarily from forest harvesting or wood products manufacturing operations and from urban wood wastes as a feedstock for direct combustion bioenergy systems for electrical or thermal power applications
Examines opportunities for utilizing biomass for energy at several different scales with an emphasis on larger scale electrical power generation at stand alone facilities and on smaller scale facilities thermal heating only such as gov t educ or other institutional facilities Identifies west wide barriers that tend to inhibit bioenergy applications incl terrain accessibility harvesting and capital costs Evaluates the role of gov t as a catalyst in stimulating new technol and new uses of biomass material Illus

A Synthesis of Biomass Utilization for Bioenergy Production in the Western United States David L.
