Eichengreen,1996 The reconstruction of the international economy was one of the great achievements of the post World War II era This reconstruction led to the most remarkable boom in international trade and lending the world has ever seen In the wake of World War II there had been widespread fears that the international economy would not be rebuilt in this way The prevailing expectation was not for a golden age of economic growth but for a slump at least as severe as the economic decline experienced in 1920 21 The achievement of the post World War II era was to contain these dangers of economic decline and possible depression In *The Reconstruction of the International Economy 1945 1960* Professor Eichengreen has chosen articles which document these achievements The bulk of the volume is divided under headings which cover the policy initiatives and trade groups which influenced policy The volume concludes with articles evaluating the postwar growth process A final article provides a current day view of retrospective and prospective successes and potential failures of this entire era This volume will be welcomed by all researchers and students interested in the important policy initiatives which led to the nearly immediate reconstruction of the world economy after the last World War Revolutions and Revolutionists Robert Blackey,1982 Telos ,1977 **Working-Class Politics in the German Revolution** Ralf Hoffrogge,2014-09-11 Richard M ller a leading figure of the German Revolution in 1918 is unknown today As the operator and unionist who represented Berlin s metalworkers he was main organiser of the Revolutionary Stewards a clandestine network that organised a series of mass strikes between 1916 and 1918 With strong support in the factories the Revolutionary Stewards were the driving force of the Revolution By telling M ller s story this study gives a very different account of the revolutionary birth of the Weimar Republic Using new archival sources and abandoning the traditional focus on the history of political parties Ralf Hoffrogge zooms in on working class politics on the shop floor and its contribution to social change First published in German by Karl Dietz Verlag as *Richard M ller Der Mann hinter der November Revolution* Berlin 2008 this english edition was completely revised for the english speaking audience and contains new sources and recent literature Power of Bonding and Non-Western Emerging Great Powers Engagement Md. Nazmul Islam,2023-10-30 In international politics states often strive to maintain their position through either cooperation or force Soft power theory

has emerged as a non violent approach for states to achieve national interest by utilizing intangible resources China and India have both successfully employed soft power strategies to expand their influence and Pakistan is a relevant case study for examining the soft power of China and India as it neighbors of both countries The withdrawal of the United States from Afghanistan has raised questions about how India and China will engage and cooperate in dealing with Pakistan as well as how they will fill the regional gap left by the US Nazmul Islam considers Joseph S Nye s Soft Power theory and develops a new idea of Power of Bonding based on non Western perspectives to examine India and China s soft power strategy on Pakistan Additionally it evaluates their areas of influence and soft power strategy in three thematic areas political and diplomatic engagement cultural attributions and attraction for power bonding and economic partnerships To accomplish these objectives the study relies on various research methods including content analysis of articles published in Pakistan s Dawn newspaper and one on one interviews with participants from Pakistan India and China
