Anuario estadístico de Cuba 2000: edición 2001 Oficina Nacional de Estadísticas,2001 Anuario estadístico de Cuba de ... ,2004 **Environmental Issues in Latin America and the Caribbean** Aldemaro Romero, Sarah E. West,2006-02-23 We began this book with a simple goal to assemble a collection of readings for an undergraduate interdisciplinary course taught by one of us AR at Macalester College This course explored environmental problems and solutions in Latin America and the Caribbean using both natural science and social science methods After a literature search failed to produce an anthology of interdisciplinary readings appropriate for the course we set out to compile one We sought papers that dealt with the most salient environmental problems in the region that were written by experts and that were appropriate for undergraduate students Most importantly we sought papers that clearly demonstrate the contributions that experts from one discipline can make to analysis in another discipline We sought papers that for example show how biological species assessments can be used to inform the politics of biodiversity conservation We sought papers that show how economic analysis can be used to predict the likely effects of human behavior on ecosystems We sought papers that pay close attention to how institutions both national and international affect the outcome of environmental initiatives To find essays that fit our needs we sent out a world wide call for papers chose the most promising submissions and subjected these submissions to peer review The twelve approved essays represent the work of researchers from Latin America and the Caribbean the United States Canada Europe and Australia All the authors have direct experience with Latin America and the Caribbean and the region s problems **the Cuban Economy** Archibald R.M. Ritter,2004-05-09 Cuba faced an economic meltdown of catastrophic proportions in the early 1990s when covert subsidies from the former Soviet Union disappeared Policies instituted by the island republic s government to handle the worst problems have had inconsistent results Opening the economy to foreign enterprise has resulted in positive growth in tourism and nickel and cigar exports However remnants of the older economy including the sugar and biotechnological industries have only experienced a decrease in capital and importance Basic educational and health services have been maintained surprisingly well but the standard of living is still far below the highs of the 1980s With contributions from many leading Cuba scholars The Cuban Economy offers not only an analysis of the economy since 1990 but also a look towards future prospects Publicaciones seriadas cubanas ,2008

International Migration in Cuba Margarita Cervantes-Rodríguez,2010-11-04 Since the arrival of the Spanish conquerors at the beginning of the colonial period Cuba has been hugely influenced by international migration Between 1791 and 1810 for instance many French people migrated to Cuba in the wake of the purchase of Louisiana by the United States and turmoil in Saint Domingue Between 1847 and 1874 Cuba was the main recipient of Chinese indentured laborers in Latin America During the nineteenth century as a whole more Spanish people migrated to Cuba than anywhere else in the Americas and hundreds of thousands of slaves were taken to the island The first decades of the twentieth century saw large

numbers of immigrants and temporary workers from various societies arrive in Cuba And since the revolution of 1959 a continuous outflow of Cubans toward many countries has taken place with lasting consequences In this book the most comprehensive study of international migration in Cuba ever undertaken Margarita Cervantes Rodr guez aims to elucidate the forces that have shaped international migration and the involvement of the migrants in transnational social fields since the beginning of the colonial period Drawing on Fernand Braudel s concept of *longue dur e* transnational studies perspectives on power and other theoretical frameworks the author places her analysis in a much wider historical and theoretical perspective than has previously been applied to the study of international migration in Cuba making this a work of substantial interest to social scientists as well as historians

Globalization and Antiglobalization Henry Veltmeyer, 2017-07-05 Globalization has changed the context for and the organizational forms of politics unleashing forces in support of and in opposition to the globalization dynamic Investigating the dynamics of change and development in two regions of the world economy Latin America and Asia this book evaluates these forces their political dynamics and the responses of governments and citizens
