Any Harm None Magical Morality:

The Ethics of Archaeology Chris Scarre, Geoffrey Scarre, 2006-01-19 The question of ethics and their role in archaeology has stimulated one of the discipline's liveliest debates. In this collection of essays first published in 2006 an international team of archaeologists, anthropologists, and philosophers explore the ethical issues archaeology needs to address. Marrying the skills and expertise of practitioners from different disciplines, the collection produces interesting insights into many of the ethical dilemmas facing archaeology today. Topics discussed include relations with indigenous peoples, the professional standards and responsibilities of researchers, the role of ethical codes, the notion of value in archaeology, concepts of stewardship and custodianship, the meaning and moral implications of heritage, the question of who owns the past or the interpretation of it, the trade in antiquities, the repatriation of skeletal material, and treatment of the dead. This important collection is essential reading for all those working in the field of archaeology, be they scholar or practitioner.

What We Want Is Free, Second Edition Ted Purves, Shane Aslan Selzer, 2014-07-07 Explores how contemporary artists use gifts, barter, and other forms of nonmonetary exchange as a means and medium of artistic production. This revised edition of *What We Want Is Free* examines a twenty-year history of artistic productions that both model and occupy the various forms of exchange within contemporary society. From shops, gifts, and dinner parties to contract labor and petty theft, contemporary artists have used a variety of methods that both connect participants to tangible goods and services and at the same time offer critiques of and alternatives to global capitalism and other forms of social interaction. Examples of these various projects include the creation of free commuter bus lines and medicinal plant gardens, the distribution of such services as free housework or computer programming, and the production of community media projects such as free commuter newspapers and democratic low-wattage radio stations. Like the first edition, the second edition includes a detailed survey of artists' projects from around the globe, as well as critical essays and artists' texts that explore the underlying social history and contemporary issues that further inform our reading of these works. This new edition also features a new introduction and additional chapters on the relation of exchange practices to democracy, the commons, object-oriented philosophy, and an examination of the impact of ongoing globalization on the economics of artists' projects. It also features a significantly expanded scope for the project histories, including work from the past decade and a new section dedicated to artist-initiated organizations and innovative models for new institutions. Praise for

the First Edition If you are an artist read this book No matter how you define and structure your practice the essays within What We Want Is Free will lead you to consider important questions about how you work and what kind of life a project can lead Nailed Magazine
