Apache Reservation Indigenous Peoples The American State:

Apache Reservation Richard J. Perry, 2014-03-07 Perry undertakes the enormous task of analyzing the historical workings of the reservation system using the San Carlos Apache as a case study The American Historical Review Indian reservations were the United States ultimate solution to the problem of what to do with native peoples who already occupied the western lands that Anglo settlers wanted In this broadly inclusive study Richard J Perry considers the historical development of the reservation system and its contemporary relationship to the American state with comparisons to similar phenomena in Canada Australia and South Africa The San Carlos Apache Reservation of Arizona provides the lens through which Perry views reservation issues One of the oldest and largest reservations its location in a minerals and metals rich area has often brought it into conflict with powerful private and governmental interests Indeed Perry argues that the reservation system is best understood in terms of competition for resources among interest groups through time within the hegemony of the state He asserts that full control over their resources and hence over their lives would address many of the Apache s contemporary economic problems

Many Nations under Many Gods Todd Allin Morman, 2018-11-22 The lands the United States claims sovereignty over by right of the Doctrine of Discovery are home to more than five hundred Indian nations each with its own distinct culture religion language and history Yet these Indians and federal Indian law rarely factor into the decisions of the country s governing class as recent battles over national monuments on tribal sites have made painfully clear A much needed intervention *Many Nations under Many Gods* brings to light the invisible histories of several Indian nations as well as their struggles to protect the integrity of sacred and cultural sites located on federal public lands Todd Allin Morman focuses on the history of Indian peoples engaging in consultation a process mandated by the National Environmental Policy Act and the Indian Religious Freedom Act whenever a federal agency s proposed action will affect land of significance to indigenous peoples To understand this process and its various outcomes first requires familiarity with the

history and culture that make these sites significant to particular Indian nations Morman provides this necessary context for various and changing indigenous perspectives in the legal process He also examines consultation itself in a series of case studies including Hopi efforts to preserve the sacred San Francisco Peaks in the Coconino National Forest from further encroachment by a ski resort the Washoes effort near Lake Tahoe to protect Cave Rock from an influx of rock climbers the Forest Service s plan for the Blackfeet site Badger Two Medicine and religious freedom cases involving the Makahs the Quechans the Western Apaches and the Standing Rock Sioux These cases illuminate the strengths and dangers inherent in the consultation process They also illustrate the need for Natives and non Natives alike to learn the history of North America in order understand the value of protecting the many cultural and sacred sites of its many indigenous peoples Many Nations under Many Gods reveals and works to meet the urgency of this undertaking **Picturing Arizona** Katherine G.

Morrissey, Kirsten Jensen, 2005-10-01 As cultural documents as works of art and as historical records photographs of 1930s Arizona tell a remarkable story They capture enduring visions of the Depression that linger in cultural memory dust storms Okies on their way to California breadlines and ramshackle tent cities They also reflect a more particular experience and a unique perspective This book places the work of local Arizonans alongside that of federal photographers both to illuminate the impact of the Depression on the state s distinctive racial and natural landscapes and to show the influence of differing cultural agendas on the photographic record The more than one hundred images by well known photographers such as Dorothea Lange and Laura Gilpin as well as by an array of less familiar photographers represent a variety of purposes and perspectives from public to personal political to promotional Six essays and three photo essays bring together prominent authorities in history the arts and other fields who provide diverse perspectives on this period in Arizona and American history Viewed together the words and images capture a Depression era Arizona bustling with activity as federally funded construction projects and seasonal agricultural jobs brought migrants and newcomers to the state They convey the celebrations and the struggles of commercial photographers archaeologists city folks farmers tourists native peoples and others in these hard times As the economic strains of the decade reverberated through the state local photographers documented the lives of Arizona residents including those frequently overlooked by historians As this book persuasively shows photographs can conceal as much as they reveal A young Mexican American girl stands in front of a backdrop that hides the outhouse behind her a deeply moving image for what it suggests about the efforts of her family to conceal their economic circumstances Yet this image is a perfect metaphor for all the photographs in this book stories remain hidden but when viewers begin to question what they cannot see pictures resonate more loudly than ever before This book is a history of Arizona written from the photographic record offering a point of view that may differ from the written record From the images and the insights of the authors we can gain a new appreciation of how one state and its indomitable people weathered our nation s toughest times **"Race" and Racism** R. Perry, 2007-10-15 Race and Racism examines the origins and

development of racism in North America It addresses the inception and persistence of the concept of race and discusses the biology of human variance addressing the fossil record of human evolution the relationship between creationism and science population genetics race based medicine and other related issues The book explores the diverse ways in which people in a variety of cultures have perceived categorized and defined one another without reference to any concept of race It follows the history of American racism through slavery the perceptions and treatment of Native Americans Jim Crow laws attitudes toward Irish and Southern European immigrants the internment of Japanese Americans during World War II the civil rights era and numerous other topics
