Transport Challenges in Latin American Cities José Manuel Vassallo, Paola Carolina Bueno, 2019-02-13 Most cities of the Latin America and the Caribbean region face similar problems including low quality public transport supply lack of planning congestion and both atmospheric and noise pollution As a response to these growing concerns many governments are implementing actions aimed at encouraging the use of more sustainable transport modes and reducing transport dependence on the private car Despite the advances gained through the implementation of these and other policies in LAC there is still a long way to go especially in the promotion of seamless transport systems at the city level the achievement of financial sustainability as well as the improvement of urban air quality This study identifies a number of best practices for overcoming or working around these challenges

Private Sector Development in an Emerging World Diederik Boer, Harald Sander, Katharina Friz, Antonella Anastasi, 2023-12-04 This book explores the interactions between private sector development public policies and societal institutions with a strong view on contributing to sustainable and inclusive development in emerging countries The private sector is often praised as an engine of economic growth This belief has led to significant efforts to promote private sector development in emerging countries Development agencies prioritize private sector development and national governments are following suit resulting in often huge incentives to stimulate and attract private investment However private sector development is not a panacea for sustainable and inclusive development as the past decades have clearly shown Economic growth societal development and environmental sustainability are often in a sharp conflict and more often than not economic growth has failed to improve the lives of all citizens This book examines the role the state and the private sector should play to benefit from the dynamics of business development while ensuring that these benefits are shared broadly without jeopardizing sustainability The views presented differ in detail but the analyses and

case studies presented share common themes namely that the relative roles of state and private sector of should be balanced and that this particular balance should be based on the context of each country in order to make the private public sector interaction work for all people
